Subject: Gallatin plan

Joe,
The attached shape file is our first whack at a districting plan for Gallatin County. I thought that we should have one that has Gallatin County in a bubble not sharing any districts at all. One district D10 is slightly over 1% deviation the rest are all under 1%. At the same time I think I have preserved most communities within the county and have some very compact districts. I have made no effort to do anything with the districts located outside the county so they don't balance at all. In the process of creating this plan I deleted D8 from the starting list so it does not appear there. The district list for Gallatin County should include D3, D4, D5, D6, D7, D9, D10, D14, and D15.

Hopefully this is useful to you. We appreciate the opportunity to be able to have a voice in this process. Please let me know if there are other submittal requirements that we need to follow.

Subject: gallatin county districting plan #2

Joe,
Here is a second plan from the Gallatin County Clerk & Recorder's office that has 9 full districts plus an "Unassigned" district that has 541 people in it that can be combined with Park County. This time I have sent the shapefile as well as 3 different PDF maps that show the detail of the proposed districts. Because of how the ESRI districting module works there are 5 districts included in the map and table that are not dealt with at all in the plan. So you will notice that districts 1, 2, 11, 12, and 13 are not balanced. Also, once again I have removed district 8 as it was easier to delete it than to move all the lines.

Please let me know if you have any questions about the plan. I will be sending you PDF's of the first plan that I sent as a shapefile to you two weeks ago as well.

Thanks for your and your committee's consideration of our plans.

Joe,
Here are PDF's of the first plan that I sent you on October 25th. Please ignore anything outside the Gallatin County boundary as those districts have not been adjusted. Hopefully these will be of assistance to you.
