Post Decree assistance primarily involves working with claimants and the Water Court to help resolve issue remarks on water rights. This assistance is generated through the on motion process (85-2-248) and objections by water users resulting in a case. Assistance includes meeting with claimants, conducting field investigations, mapping, and providing recommendations and technical reports pertaining to individual cases. In addition, assistance is requested by the Water Court to help with certified cases before and after the initial decree phase. Unique requests to help the Water Court resolve specific cases such as large basin mapping projects, and other technical requests fall within the general assistance category.
