

Dear Economic Affairs Committee

I am hearing you have a chance to put an expiration date on milk like all other states and products. The clerk at the grocery store said this would help the price of milk come down. I just want you consider changing this rule. I am sure the old rule is to protect the famer but who is looking out for all us Montana consumers. I feel like everyone wants us to pay their way but what is in any part of higher prices for me. I am 68 and still working I need a break. Change the rule if it will help all Montana families.

Thank you

Terry Falldorf
