oversight

**Comment:**

Honorable Legislators: I filed "Write for Supervisory Control", following all directions which included 10 copies with exhibits, hard copies as forbidden to use e-service but forced to accept e-service from Supreme Court of Montana. The cost was very heavy to copy and ship via UPS. The exhibits had to follow cover and Request due to pandemic and I was quarantined until two days after I got my grandchild to mail those in. Before Court had even received my exhibits which detailed complete disregard for all law, procedure, precedent, jurisdiction and civil rights, I received Denial based on "When Mr. Yapuncich is convicted, he has regular appeals available." There's no oversight for such a travesty. Evidently I was to be convicted regardless. That's not unusual for Native American. The fact that Court can't tell "Write" from "Interlocutory Appeal" is such a shock to the sensibilities of justice as to escape my ability to describe. There is nowhere to go for oversight as Attorney General had already stated about the County Prosecutor: "We pretty much let these guys do whatever they want. You can proceed but if you never hear an answer from us it's because our server can't accept large files." There needs to be a separate board to oversee these people who don't know the law or rights or procedure or precedent or jurisdiction. You may contact me for exhibits or testimony if you want. Thank you for giving me a chance to comment.

Judicial oversight

**Comment:**

The Black robe mafia/cabal is in dire need of oversight and reform. I will make it my lifetime commitment to see and enact much needed change to the current cesspool in black robes.
