Agency Priority:	1
Contact:	Laurie Bakri
Project Name:	CARS (Credentialing and Registration System)
Description:	Comprehensive system to issue Drivers' Licenses, registrations, titles, and plates
Scope:	Complete replacement of MERLIN, the current system.
Objectives:	Implement a stable, supportable, modern system that also allows for citizens to do transactions remotely.
Risks:	MERLIN's instability, Lack of resources, quick timeline
Benefits:	Secure, modern, customer friendly, accurate system with online transactions for citizens.
Business Justification:	Current system is 15 years old, unstable, and unsupportable or expandable
Will the system, application, and/or service	No (Please Explain)

reside within SummitNet boundary?:

SummitNet Boundary Explanation :

Will the system use Active Directory or Okta for authentication?: Yes

Authentication Explanation:

What is the State Data Classification Level for the system?: Level 2 - CJ, FTI, PHI, PII

Describe data flow (outgoing and incoming). Are there any connections to external entities?:

Fast Hosting Services recommends the Agency procure redundant AWS Direct Connects with at least 1 Gbps capacity to connect the Agency network to the AWS enclave. Communication between the Agency and Amazon Web Services will be required in both directions. This communication is required by the FAST application. FHS has outlined most of the required firewall penetrations below. Some IPs may be indicated by an X.X.X.X, meaning that the IPs for those systems are currently unknown, whether part of AWS, the Agency, or third parties such as interface partners.
