**LFD**   
MONTANA LEGISLATIVE FISCAL DIVISION  
[www.leg.mt.gov/css/fiscal](http://www.leg.mt.gov/css/fiscal)

**Corporation Income Tax**

**Revenue Description**

The corporation income tax is levied against a corporation's net income earned in or attributable to Montana, adjusted for allowable credits.

**Statutory Reference**

Tax Rate – [15-31-121, MCA](#)

Tax Distribution – [15-31-121, MCA](#)

Date Due – 15<sup>th</sup> day of the fifth month following the close of the corporation fiscal year ([15-31-111, MCA](#) and [15-31-502, MCA](#)). Estimated taxes due April 15<sup>th</sup>, June 15<sup>th</sup>, September 15<sup>th</sup>, and December 15<sup>th</sup> ([15-31-502, MCA](#)).

**Applicable Tax Rates**

The tax rate is 6.75%, except for corporations making a "water's edge" election ([15-31-322, MCA](#)), who pay a 7.0% tax on their net income.

**Collection Frequency:** Monthly, quarterly, and annually

**Distribution:** All proceeds are deposited into the general fund

**Summary of Legislative Action:**

[SB 124](#) changes the multi-state tax apportionment from a three factor with double-weighted sales apportionment, to a single factor apportionment based on sales.

[SB 246](#) eliminates the list of countries considered tax havens that under current law are included in the tax base of corporations that elect water’s edge filing status for Montana corporate income tax.

[SB 506](#) increases the maximum charitable endowment credit amount from \$10,000 to \$20,000 starting in TY 2024. The bill also eliminates the sunset of the endowment tax credit after TY 2025.

Corporation Income Tax – Legislation Passed by 68th Legislature			
General Fund Impact (\$ Millions)			
Bill Number and Short Title	FY 2023	FY 2024	FY 2025
SB0124 Revise corporate income tax apportionment	\$0.000	\$0.000	\$4.884
SB0246 Revise corporate income tax water's-edge election laws	0.000	(1.386)	(1.357)
SB0506 Increase and repeal termination of Montana charitable endowment tax credit	0.000	0.000	(0.010)
<b>Total General Fund Impact</b>	<b>\$0.000</b>	<b>(\$1.386)</b>	<b>\$3.517</b>

**Forecast Risks**

- Stock market activity
- Oil price
- Housing market outlook

**Revenue Estimate Methodology**

Data

The estimate for this source is based on collection data from SABHRS, corporation income tax return data from DOR, and various historical and forecast economic indicators from IHS Markit. The return data is lagged by nearly two years for two main reasons: each tax year includes all returns from corporations whose fiscal year began in that particular tax year; and corporations are allowed up to 10.5 months after the end of the tax year to file a return.

Analysis

Montana corporation tax liability is forecast using a variety of IHS Markit economic variables as predictors. These variables are used to forecast calendar year tax liability by sector. Major sectors include manufacturing, financial services, retail trade, and mining. Once estimates have been produced individually for all relevant sectors, they are combined to form a total estimate of calendar year liability. The calendar year estimate is converted to a fiscal year estimate, with adjustments made to account for refunds, audits, penalties, and credit reimbursements.

As shown in the figure below, energy related sectors have historically accounted for a significant portion of total tax liability. The underlying volatility of the energy industry is a large contributor to the overall volatility of this tax source.

Corporation income tax revenues are quite volatile from year to year, resulting in a revenue stream that is difficult to predict. The volatility can be attributed to many factors: sensitivity of corporation income to business cycles, industry composition in the state, reliance on a limited number of large taxpayers, and federal and state tax policy. For example, Montana law allows corporations to carry back current year losses for three years, and carry forward losses for up to ten years [HB 550 \(2017 Session\)](#). The carry back provision may result in magnifying a downturn to the extent that corporations file amended prior year tax returns that include current year losses, and are thereby owed a refund of taxes paid in those previous years.

Forecasting error is produced through three main channels: timing of data, in the inherent error of IHS Markit forecast economic variables, and in the model itself as past collections are not predicted perfectly by selected IHS Markit variables. Combined with the uncertainty involved in predicting audit and refund amounts, these sources of error can lead to revenues that may significantly deviate from forecast values and prior year collections.

While corporations’ tax behavior introduces forecasting error that is difficult to predict, [research by the LFD](#) explores methods to minimize the errors associated with the IHS Markit forecasts of underlying economic variables and compares the relative accuracy of various model types. The research suggests that using a sector-based modeling approach consistently performs better than models that used a single variable as a predictor. While corporation income tax will likely continue to be a volatile source, the methods utilized by this research should direct modeling choices that will minimize the error introduced by IHS Markit forecast error.

Assumptions

Each of the 11 sectors are listed below, followed by the five-year average share of tax liability, a brief description of the sector, and the underlying economic variables used to develop the projection. The variables used to develop most of the projections are the average price of West Texas Intermediate (WTI) oil price, Montana retail sales, and Montana median home prices.

- Manufacturing (14.0%): the manufacturing industry in Montana is highly correlated with energy prices and is therefore relatively variable with respect to its aggregate tax liability. This sector is modeled using IHS Markit forecast of WTI price.
- Financial services (25.0%): this sector includes banks, bank holding corporations, and companies involved in investment activities. Financial sector tax liability is modeled on median existing home prices in Montana as well as Montana wholesale employment
- Wholesale and retail trade (18.0%): this combined sector trends well with Montana retail sales and therefore uses retail sales to predict future sector revenue
- Mining (0.3%): the mining industry in Montana is heavily dependent on energy prices; it is modeled on gold and copper prices
- Professional and business services (16.0%): the professional service sector comprises establishments that specialize in performing professional, scientific, and technical activities for others. The business service sector comprises establishments performing routine support activities for the day-to-day operations of other organizations. This sector is modeled using a five-year moving average
- Transportation and warehousing (13.0%): the transportation and warehousing sector includes industries providing transportation of passengers and cargo, warehousing and storage for goods, scenic and sightseeing transportation, and support activities related to modes of transportation. Its tax liability is modeled on forecast WTI price and Montana population
- Information (5.0%): the main components of this sector are the publishing industries, the motion picture and sound recording industries, the broadcasting industries, the telecommunications industries, and the information services industries. Its tax liability is modeled on 3-month commercial paper
- Utilities (1.0%): the utilities sector includes establishments engaged in the provision of electric power, natural gas, steam supply, water supply, and sewage removal. The tax liability of this sector is modeled on the average number of housing starts per year. This sector is modeled using a five-year moving average
- Agriculture (3.0%): the tax liability of the agriculture sector is modeled on forecast cattle prices.
- Social and educational services (2.0%): this is a broad grouping of educational and health services, and arts, entertainment, and recreation. The tax liability is modeled on GDP. This sector is modeled using a five-year moving average
- Construction (2.0%): next to the utility sector, the construction industry is the smallest contributor to corporation tax liability, likely because most construction companies are organized as S-corps or limited liability companies. Its tax liability is modeled on WTI price and wholesale employment

**Business and Personal Taxes****Corporation Income Tax**

Calendar year corporation income tax liabilities are modeled by sectors as described above and summed by year to produce a total calendar year estimate of tax liabilities. The calendar year estimates are converted to fiscal year using historical trends.

**Adjustments**

After the estimate for the fiscal year gross corporation tax liability is complete, several adjustments are required. The adjustments and the corresponding estimate process for each is described below.

- Refunds – Projected on a historical average ratio of current fiscal year liability
- Audits, penalties & interest – Projected on a historical average ratio of prior fiscal year liability

**Revenue Estimate Assumptions**

This section contains the assumptions used to generate the revenue estimates contained in House Joint Resolution 2. It does not reflect changes, if any, enacted by the 2023 Legislature.

**Revenue Projection**

Revenue History

**Driver's License Fees**

**Revenue Description**

A resident of Montana must have a valid driver's license to operate a motor vehicle on any highway in the state. A driver's license is issued only if the applicant passes specified examinations and pays fees. The fees are collected by Department of Justice, Motor Vehicle Division staff or county treasurers and are forwarded to the state treasurer for deposit. If collected by the county treasurers, a portion is retained by the county. The estimates shown in this source are net of revenue retained by the counties. The fees included in this source are from regular driver's licenses, commercial driver's licenses, motorcycle endorsements, duplicate driver's licenses, and renewal notices.

**Statutory Reference**

Tax Rates – Duplicate licenses: [61-5-114, MCA](#); all others: [61-5-111\(6\), MCA](#)

Tax Distribution – [61-5-121, MCA](#)

Date Due – Upon application

**Applicable Tax Rates**

- Driver's license, except a commercial driver's license: \$5.00 per year or fraction of a year
- Motorcycle endorsement: \$0.50 per year or fraction of a year
- Commercial driver's licenses (includes the basic license fee of \$5.00)
  - Interstate: \$10.00 per year or fraction of a year
  - Intrastate: \$8.50 per year or fraction of a year
- Duplicate license: \$10.00
- Renewal notice: \$0.50

**Collection Frequency:** Monthly

**Distribution**

The distribution of license fee revenue varies by the type of license and who collects the fee. The table below shows the current statutory distribution. Note that the portion allocated to counties applies only when the county collects the fee. Otherwise, the county allocation is added to the general fund distribution.

Distribution of Driver's License Fees					
Allocation	Driver's License	Replacement License	Motorcycle Endorsement	Commercial Driver's License	Renewal Notice
County or State General Fund	2.50%	3.75%	3.34%	2.50%	
Motorcycle Safety Account			63.46%		
Traffic Education Account	20.70%	8.75%		16.94%	
State General Fund	<u>76.80%</u>	<u>87.50%</u>	<u>33.20%</u>	<u>80.56%</u>	<u>100.00%</u>
Total	100.00%	100.00%	100.00%	100.00%	100.00%

**Summary of Legislative Action:**

The 68<sup>th</sup> Legislature did not enact legislation impacting this source.

**Forecast Risks**

- Growth of population over age 16
- Potential impact from youth driving habits

**Revenue Estimate Methodology**

The driver's license revenue estimate is based on the number of the six various licenses and fees, multiplied by the applicable fee. The number of licenses is modeled on the Montana driving age population.

Data

There are six different sources of revenue—five different driver's licenses and the renewal notice. The best source of data for the number of licenses and the renewal notice is contained in the history of revenue collections for each of these six items from SABHRS.

Analysis

The methodology used to determine the number of each license or fee differs slightly:

1. The proxy numbers for driver's and motorcycle licenses are obtained by multiplying the driving age population estimate for each year by the last known actual ratio of driver's licenses to driving age population. This ratio differs between odd and even years, and is applied accordingly.
2. For duplicate licenses, the proxy number is derived by multiplying the number of driver's licenses by the previous year's ratio between the number of duplicates and drivers licenses. Because the driver's license proxy includes the effects of population change, these effects are also included in the proxy for duplicate licenses.
3. The proxies for the number of interstate and intrastate licenses are the amounts from the last known fiscal year.
4. To approximate the number of renewal notices, the ratio between the previous years' number of notices to the proxy number of licenses is multiplied by the estimated number of licenses. Since the license proxy includes the effects of population change, these effects are also included in the proxy for renewal notices.
5. Based on historical percentages, amounts retained by the counties are calculated and subtracted from the total revenue to derive the state's portion.

Adjustments and Distribution

Once the proxy number for each license has been estimated, adjustments, if any, are made. After any adjustments, the applicable distribution percentage of the revenue for each license fee is applied (see the "Distribution" section).

**Revenue Estimate Assumptions**

This section contains the assumptions used to generate the revenue estimates contained in House Joint Resolution 2. It does not reflect changes, if any, enacted by the 2023 Legislature.

**Revenue Projection**

**Revenue History**

**Individual Income Tax****Revenue Description**

The tax is levied against taxable income, which is defined as Montana adjusted gross income less exemptions and deductions. Once tax liability is determined, the amount of tax due is computed by subtracting allowable credits.

**Statutory Reference**

Tax Rate – [15-30-2103, MCA](#) through [15-30-2105, MCA](#)

Tax Distribution – [17-2-124\(2\), MCA](#)

Date Due – 15<sup>th</sup> day of the fourth month of the filer's fiscal year ([15-30-2604, MCA](#)). Withholding taxes are due monthly, quarterly, or on an accelerated schedule depending on income ([15-30-2504, MCA](#)). Estimated taxes are due on the 15<sup>th</sup> day of the 4<sup>th</sup>, 6<sup>th</sup>, and 9<sup>th</sup> month and the month following the close of the tax year ([15-30-2512, MCA](#)).

**Applicable Tax Rates**

Tax rates vary from 1.0% to 6.75% (4.7% and 5.9% beginning in CY 2024), depending on the level of taxable income. Tax brackets, personal exemption amounts, and the standard deduction are adjusted for inflation each year. Due to the capital gains income tax credit, the effective tax rate on capital gains income is less than the tax rate on ordinary income by 2.0%. Beginning in TY 2024, net long-term capital gains are taxed at either 3.0% or 4.1%.

**Collection Frequency:** Quarterly, monthly, bi-weekly, and weekly

**Distribution:** All proceeds are deposited into the general fund.

**Summary of Legislative Action:**

[HB 192](#) transferred \$180 million from the general fund to a state special revenue fund for an income tax rebate and exempts the rebate from Montana personal income tax.

[HB 221](#) replaces the present law 30.0% net long-term capital gains deduction set to take effect in TY 2024 with two separate capital gains tax rates: 3.0% and 4.1%.

[HB 222](#) provides a rebate of up to \$500 for Montana property taxes paid in TY 2022 and again for taxes paid in TY 2023. Taxpayers who receive a rebate and itemized their federal income tax deductions for TY 2022 may need to report a portion of taxable income for TY 2023. This may reduce their Montana income tax liability because of a larger federal liability.

[HB 225](#) creates a state refundable individual income tax credit for taxpayers who legally adopt a child. The state credit is \$7,500 if the adopted child was in the state foster care system and \$5,000 for all other adoptions.

[HB 245](#) expands the Trades Education and Training tax credit to include additional occupations and industries and to extend the expiration date of the credit to December 31, 2028.

[HB 408](#) increases the tax credit caps available under the Innovative Educational Program (IEP) public-school tax credit and the Student Scholarship Organization (SSO) program for non-public schools.

[HB 816](#) provides a supplemental property tax rebate in FY 2024 and FY 2025. Similar to HB 222, those taxpayers who itemize at the federal level may see a reduced state income tax liability.

[SB 104](#) exempts, for up to five years, a portion of certain military retirement pay from Montana personal income tax for taxpayers who become residents of the state after June 30, 2023, or who were a resident of the state before receiving military retirement income and remained a resident.

[SB 121](#) reduces the top personal income tax rate from 6.5% to 5.9% and increases the state Earned Income Tax Credit (EITC) rate from 3.0% of the federal credit to 10.0%.

[SB 124](#) changes the multi-state tax apportionment from a three factor with double-weighted sales apportionment, to a single factor apportionment based on sales. Individual income tax revenue from ownership of pass-through entities will also be impacted by this bill.

[SB 506](#) increases the maximum charitable endowment credit amount from \$10,000 to \$20,000 starting in TY 2024.

[SB 550](#) makes several changes to Montana’s personal income tax language. It also extends and expands the Montana Medical Savings Account personal income tax exemption.

[SB 303](#) increases fines for not filing necessary wage withholding or mineral royalty withholding annual statements with the Department of Revenue.

Individual Income Tax – Legislation Passed by 68th Legislature General Fund Impact (\$ Millions)

**Forecast Risks**

- Changes to the national economic growth outlook
- Changes to Montana’s economic growth outlook
- Changes to the outlook for Montana wages
- Stock market activity
- Housing prices and sales

**Revenue Estimate Methodology**

Data

The estimate for this source is based on collection data from SABHRS, individual income tax return data supplied by DOR, state and national historical and forecast data on income, inflation, employment, and other economic variables from IHS Markit.

Analysis

*Overview*

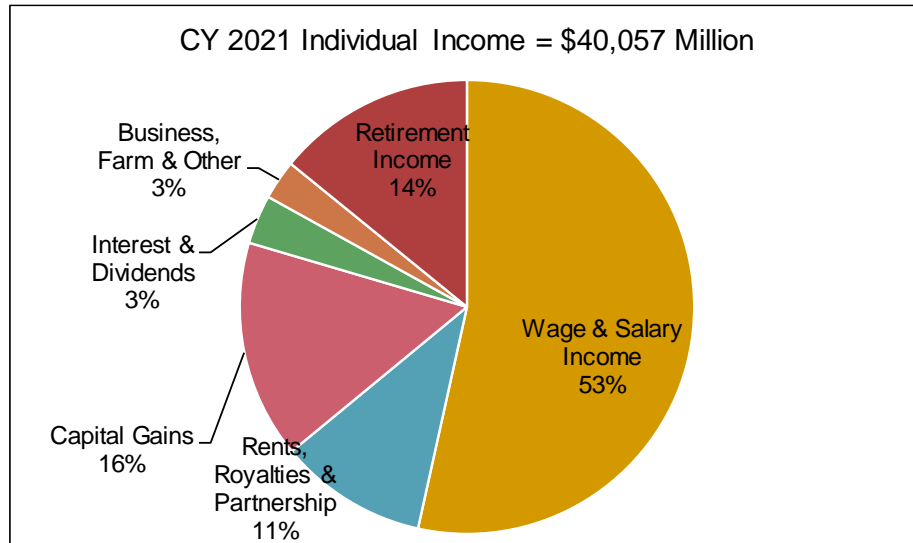

An individual income tax simulation model is used to forecast Montana calendar year individual income tax liability for all residents. The calendar year state tax liability forecast is developed by applying modeled growth rates to each resident taxpayer’s income and deduction items. The result is a forecast of calendar year state individual income tax liability for each resident, the sum of which produces a statewide forecast of individual income tax liability for each year.

The statewide forecast of resident liability is adjusted for the growth in resident taxpayers and multiplied by an all-filers percentage to include the tax liability for nonresidents and partial-year residents. This results in a forecast of total calendar year individual income tax liability before credits.

Fiscal year collections before audit, penalty, and interest income are modeled on total calendar year liability before credits and forecast fiscal year collections are then augmented by expected future audit, penalty, and interest collections to produce the total individual income tax revenue estimate.

**Growth Rates**

Growth rates are modeled for each of the income, adjustment, addition, reduction, and deduction line items. The models for most of the income line items are highlighted in this section, along with corresponding forecast risks. Nearly two-thirds of all income reported is from wages and salaries; the broad revenue categories are shown in the adjacent chart.

The table below summarizes the growth rates used for returns, inflation, and income items. Growth estimates for all other line items—adjustments, additions, reductions, and itemized deductions—are included in the revenue estimate assumptions section, which is available online.

Individual Income Growth Rates						
	CY 2022	CY 2023	CY 2024	CY 2025	CY 2026	CY 2027

Other income	0.0%	0.0%	0.0%	0.0%	0.0%	0.0%

Wage and salary income is the largest source of individual income and is modeled on the IHS Markit series for Montana wage and salary distributions.

**Reasons for Decline in Upcoming Biennium**

Individual income tax collections are forecast to decline by 15.0% in FY 2023, then grow by 2.6% and 4.4% respectively in FY 2024 and FY 2025. The decline is driven by forecasted declines in capital gains

and IRA income, and the assumption that a portion of collections in FY 2022 were not a product of ongoing economic activity.

In CY 2021, the full-year-resident statewide tax liability was \$1,728.9 million. In FY 2022 the state collected \$2,393.8 million. While fiscal year collections typically surpass the calendar year liability, last year was quite drastic. CY liabilities typically represent 87.0% of FY collections, though last year it was only 72.2%.

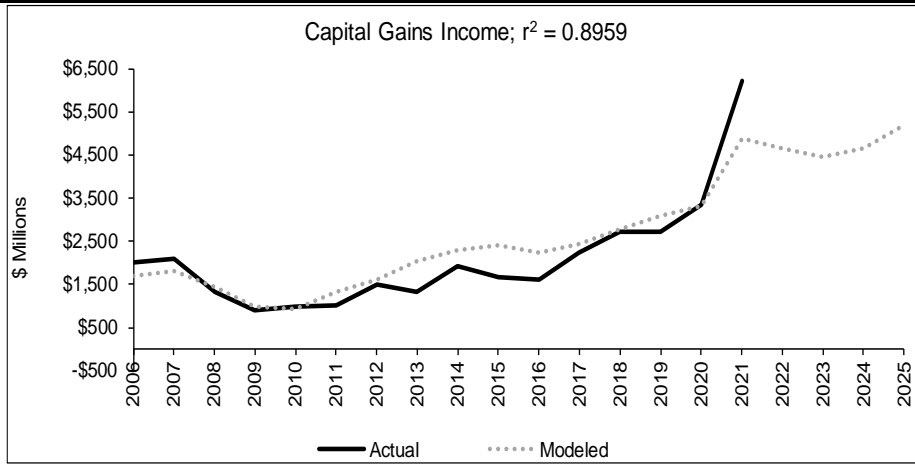

The discrepancy between calendar year liabilities and fiscal year collections suggests that there was upwards of \$400 million in collections that was not explained by the prior year liabilities. Given this discrepancy, it is possible that individuals made significant capital gains realizations in early CY 2022 and have already paid taxes on that income as opposed to paying them in April 2023 when they are due. It is also possible that taxpayers opted to move their refunds from this past April to future years. In addition, taxpayer may be making safe harbor payments on their estimated payments, in which case they are paying based upon their known liability from the prior year. These assumptions could result in higher refunds and lower payments in this upcoming spring tax season.

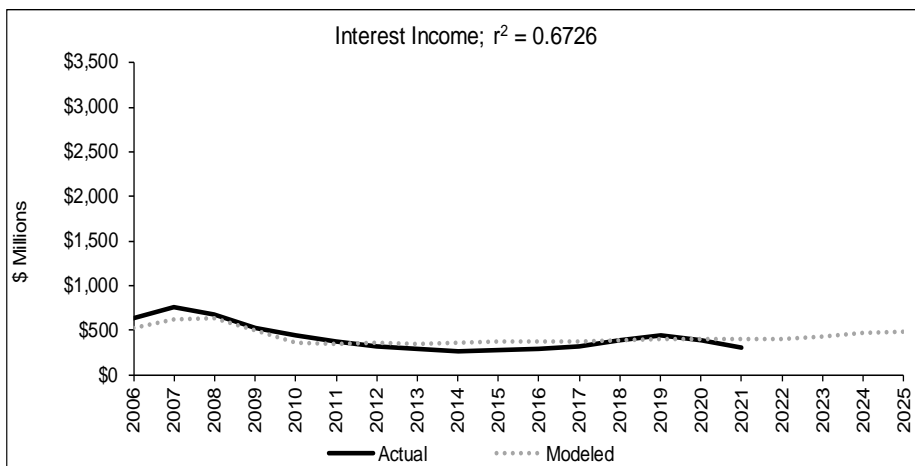

Rent, royalty & partnership (schedule E) income is modeled on S&P 500 and before tax corporate profits and in recent years has trended quite well.

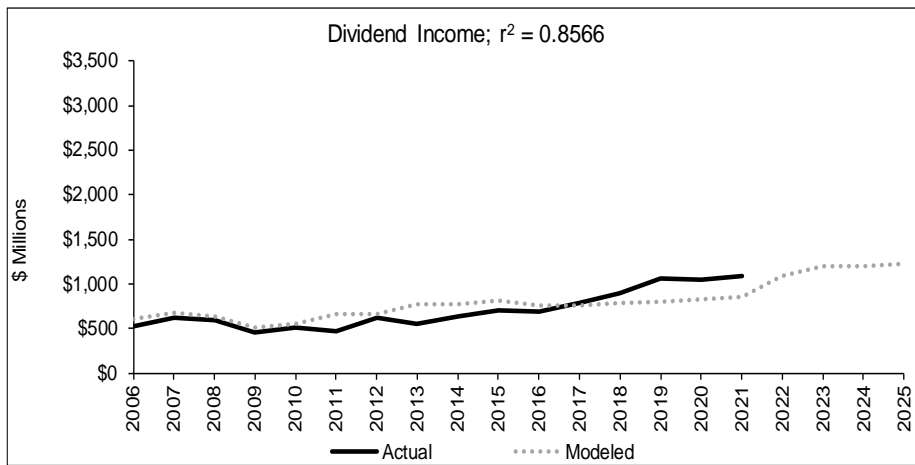

Capital gains income is modeled on a three-year difference of the S&P 500 stock market index, Montana median house price, and the annual number of Montana home sales.

Interest income is modeled on the rate of 3-month negotiable CDs (Certificate of Deposit) and national personal interest income.

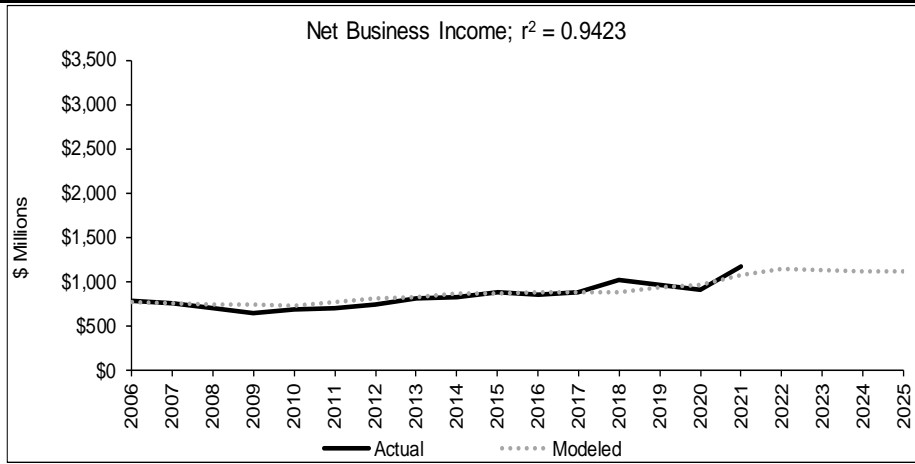

Dividend income is modeled on before-tax corporate profits.

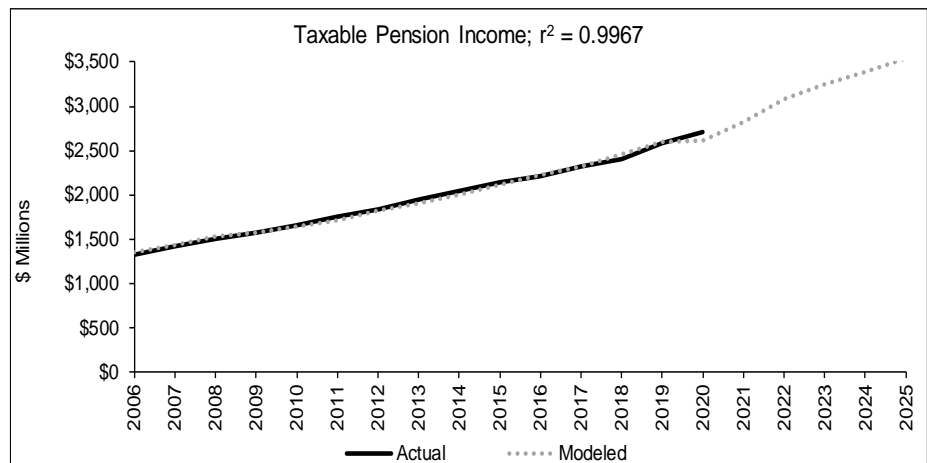

Net business income is modeled on national non-farm proprietor's income, Montana farm proprietor's income, and gross state product for the construction industry.

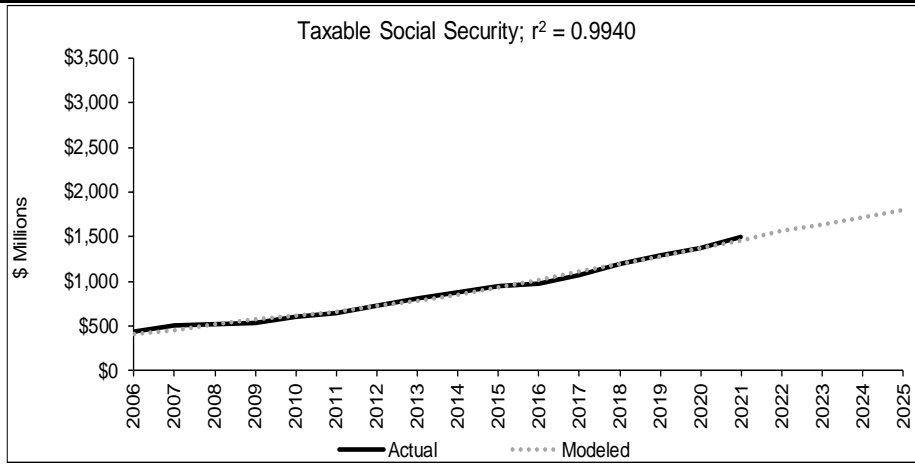

The two of the three retirement income sources—IRA distributions and pension income—are modeled on the S&P 500 stock market index, gross domestic product, and the number of Montanans age 65 and older. The projected drop in IRA distributions is due to a provision in the federal CARES Act which deferred required minimum distributions from certain retirement accounts.

Taxable social security is modeled on federal transfer payments to Montana and Montana population age 65 or older.

All remaining income sources, including farm income, sum to a negative amount. These sources are forecasted individually but are generally anticipated to remain at about the same as the level as the last known year.

*Audits and Other Assumptions*

Fiscal year audit, penalty and interest revenue is assumed to remain at a recent historical average of the prior calendar year tax liability before credits. Audit, and penalty and interest revenue are added to the modeled fiscal liability, resulting in total fiscal year collections.

**Revenue Estimate Assumptions**

This section contains the assumptions used to generate the revenue estimates contained in House Joint Resolution 2. It does not reflect changes, if any, enacted by the 2023 Legislature.

**Revenue Projection**

**Revenue History**

**Insurance Tax & License Fees**

**Revenue Description**

An insurance premiums tax is levied on the net premiums or gross underwriting profit for each insurance company operating in Montana. Various insurance and license fees are also collected.

**Statutory Reference**

Tax Rate – [33-2-705\(2\), MCA](#); [33-2-311, MCA](#); [33-28-201\(1&2\), MCA](#); [50-3-109\(1\), MCA](#);

Fee Rate – Many of the fees are contained in [33-2-708\(1&2\), MCA](#); all other fees are listed in various chapters of [Title 33, MCA](#)

Tax Distribution – [33-2-708\(3\), MCA](#); [33-2-712, MCA](#); [50-3-109\(1\), MCA](#); [33-28-120, MCA](#)

Date Due – March 1<sup>st</sup> each year ([33-2-705\(1\), MCA](#); [33-2-712, MCA](#); [33-28-201\(1&2\), MCA](#)). Quarterly payments due the 15<sup>th</sup> of April, June, September and December (Administrative Rules [6.6.2704](#) and [6.6.2705](#))

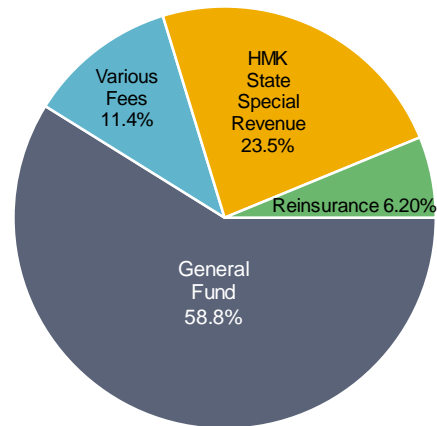

**Applicable Tax Rates**

- 2.75% of net premiums on policies sold in Montana
- An additional 2.5% tax on the fire portion of net premiums for selected risks
- 0.4% on the first \$20 million of net direct premiums and 0.3% on each subsequent dollar collected by captive insurance companies
- 1.2% reinsurance assessment on most health policies

**Collection Frequency:** Quarterly and annually

**Distribution**

Insurance tax and license fee revenue is distributed primarily between the general fund and the Healthy Montana Kids state special revenue fund. Exceptions include fire insurance premiums which are deposited fully to the general fund, captive insurance company premiums which are deposited 95.0% to the general fund and 5.0% (along with any fees and assessments to captive companies) to a fund for administration of such companies, the genetics fee which is deposited into a state special fund for genetic testing, and the remaining fees which are deposited in a state special fund for use by the State Auditor. A 1.2% assessment on health policies is deposited into the reinsurance pool to be matched with federal funds to cover high cost claims. The following chart shows the FY 2020 distribution of insurance tax and license fee revenue.

**Summary of Legislative Action:** The 68th Legislature did not enact legislation impacting this source.

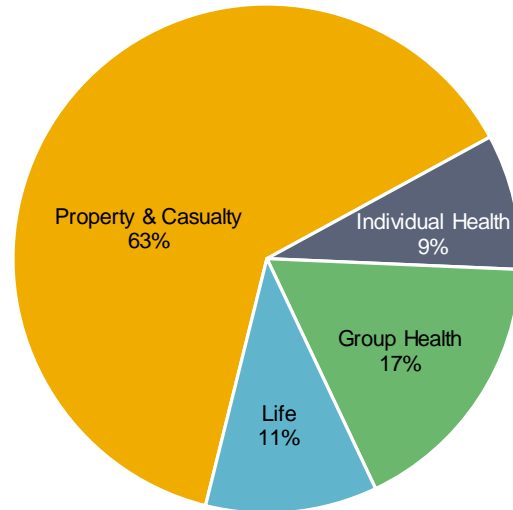

**Forecast Risks**

- Changes in the forecast for personal consumption expenditures for the finance and insurance services sector
- Changes in health insurance premium costs
- Changes in health insurance purchases on the exchange

Data

The insurance tax and license fee estimate is based on data obtained from SABHRS, the State Auditor’s Office (SAO) and IHS Markit. Fiscal year collections come from SABHRS; detailed historical data and future estimates for offsets and refunds are from the SAO; forecasts for independent economic variables are produced by IHS Markit.

CY 2021 Premium Tax by Type

Analysis

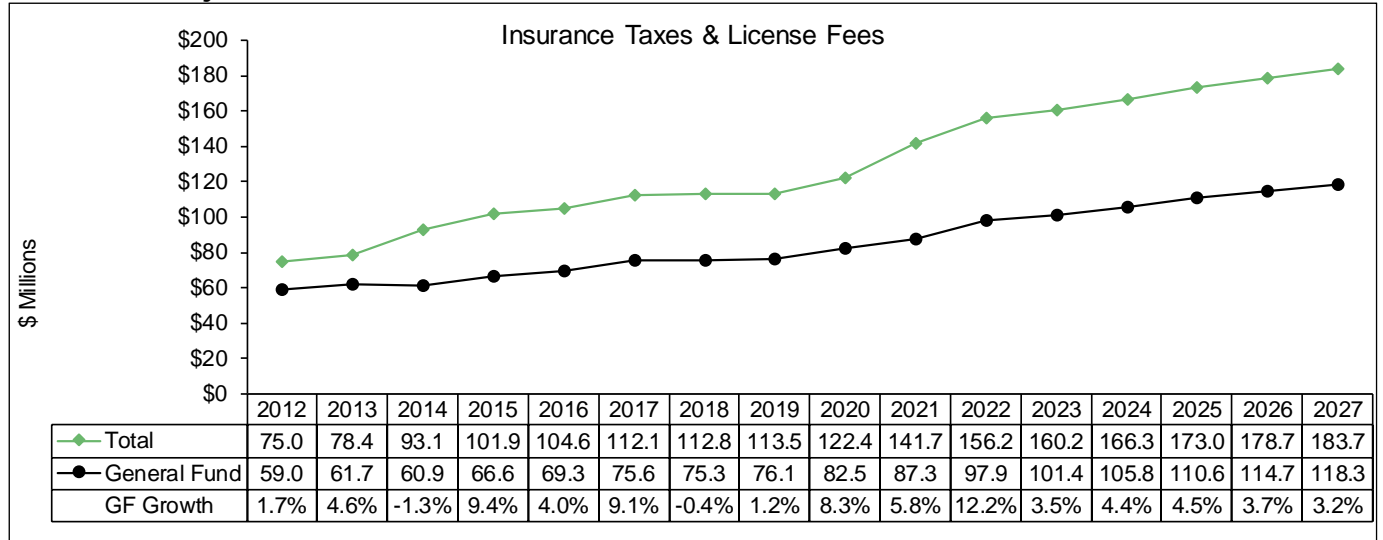

Total taxes and fees are calculated by summing the forecasts for premium taxes and all other fees as estimated individually. Premium taxes are forecast with a regression model using the independent, IHS Markit-provided values for the Montana personal consumption expenditure (PCE) series for finance and insurance. Changes in health insurance spending due to the Affordable Care Act are assumed to be captured in the IHS Markit forecast of Montana PCE for finance and insurance. Estimates for the various fees are based on time trends or an assumption of no growth.

**Revenue Estimate Assumptions**

This section contains the assumptions used to generate the revenue estimates contained in House Joint Resolution 2. It does not reflect changes, if any, enacted by the 2023 Legislature.

FY	Total Revenue \$ Millions	GF Tax \$ Millions	Proxy Insurance Tax \$ Millions	MT PCE Fin. & Ins. \$ Millions	GF Insurance Fees \$ Millions	Non-GF Ins. Fees \$ Millions

Revenue Projection

Revenue History

### Investment License Fee

#### Revenue Description

Investment advisors and investment companies pay fees to the state for registration of securities and agents, registration of securities by notification, notice of a federal filing of a federally secured security, and name changes.

#### Statutory Reference

Fee Rate – [30-10-209, MCA](#) and [30-10-904, MCA](#)

Fee Distribution – Excess to general fund: [30-10-115, MCA](#) and [30-10-209\(6\), MCA](#); portfolio notice fee: [30-10-209\(1d\), MCA](#), [30-10-210\(2\), MCA](#) and [30-10-907, MCA](#)

Date Due – Dealers: upon registration and annually before December 31<sup>st</sup> thereafter ([30-10-201 \(9&11\), MCA](#)); securities: upon registration ([30-10-206, MCA](#)) and renewal ([30-10-209\(1b\)](#))

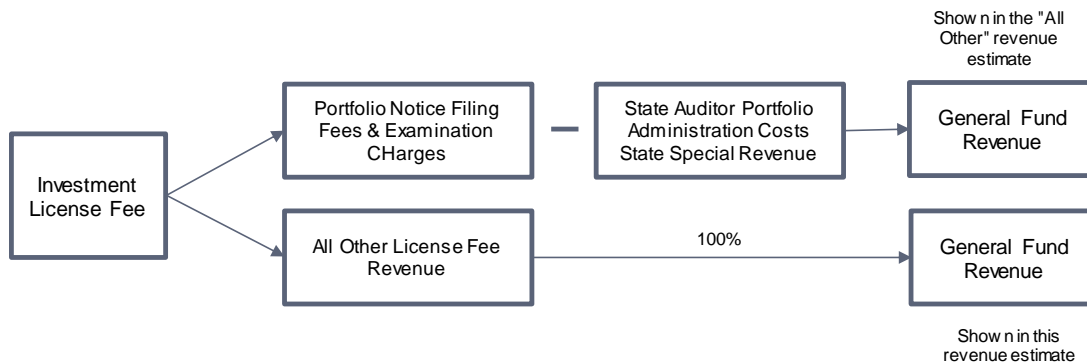

#### Applicable Tax Rate

Initial and annual security registration fees vary based on the offering price of securities but cannot be less than \$200 or more than \$1,000. Initial and annual registration fees for a broker-dealer, investment adviser, and federal covered adviser are \$400. Initial and annual registration fees for a salesperson or investment adviser are \$100 for an out-of-state salesperson and \$50 for an in-state salesperson. The fee for name changes to series, portfolio, or a subdivision of an investment company is \$50.

**Collection Frequency:** Varies

#### Distribution

All fees except portfolio notice filing fees and examination charges are deposited to the general fund. Portfolio notice filing fees and examination charges are deposited in a state special revenue account from which the State Auditor pays for expenses associated with the regulation of portfolio activities. The excess in this account is transferred to the general fund throughout the year as a non-budgeted transfer and is shown under the “All Other” revenue category.

#### Summary of Legislative Action:

The 68th Legislature did not enact legislation impacting this source.

#### Forecast Risks

- Changes in the forecast for personal consumption expenditures for the finance and insurance services sector

#### Revenue Estimate Methodology

Investment license fee revenue is obtained from two major sources: portfolio notice filing and examination fees, and various other fees. The portfolio notice filing fees, examination fees, and other permit revenue are estimated separately and then summed.

Data

The estimate for this source is based on historical collection data from SABHRS, historical license purchases by type from the State Auditor’s Office (SAO), and actual and forecast Montana personal consumption expenditures series for finance and insurance services from IHS Markit.

Analysis

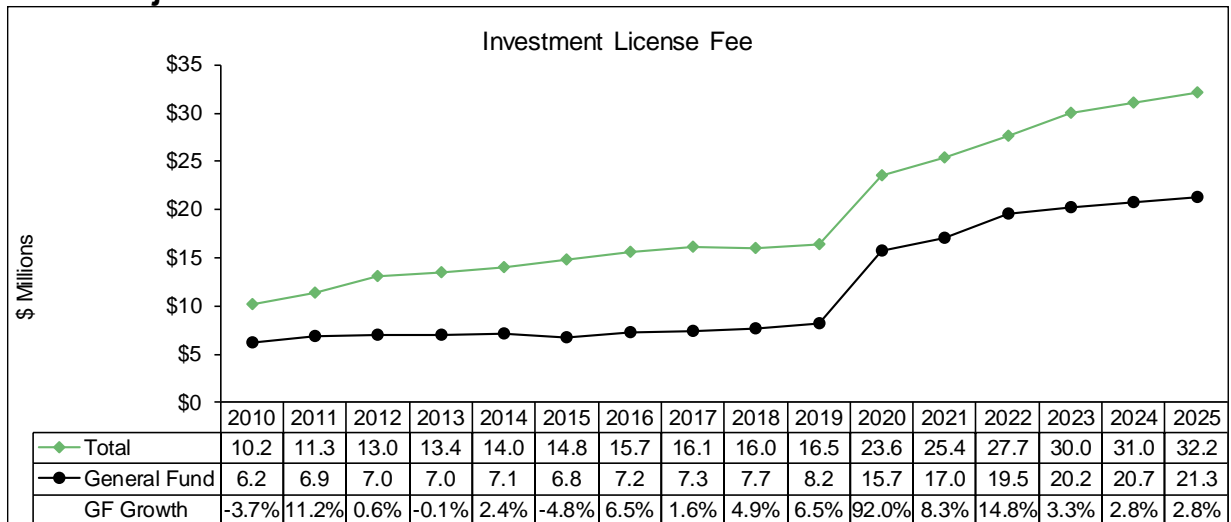

Licenses and permits receipts, and portfolio notice filing fees are modeled separately on the Montana personal consumption expenditures series for finance and insurance services.

**Revenue Estimate Assumptions**

**Revenue Projection**

**Revenue History**

**Lodging Taxes****Revenue Description**

The state imposes two taxes on room charges collected by lodging facilities and campgrounds: a lodging sales tax and a lodging facility use tax. The taxes only apply for rooms used for lodging which includes hotels, motels, campgrounds, resorts, dormitories, condominium inns, dude ranches, guest ranches, hostels, public lodging houses, and bed and breakfast facilities. Exempt are facilities for health care, facilities owned by non-profit corporations for use by youth for camping, facilities whose average daily charge is less than 60.0% of the amount the state of Montana reimburses for lodging, and facilities rented for 30 days or more. The 4.0% lodging sales tax also applies to online travel agencies, and exempts sales to the U.S. government.

**Statutory Reference**

Tax Rate – [15-65-111, MCA](#) (4.0% lodging facility use tax); [15-68-102, MCA](#) (4.0% lodging sales tax)

Tax Distribution – [15-65-121, MCA](#) (4.0% lodging facility use tax), [15-68-820, MCA](#) (4.0% lodging sales tax)

Date Due – The 4.0% lodging facility use tax is due before the end of calendar quarter ([15-65-112, MCA](#)). The 4.0% lodging sales tax is due the last day of the month following the calendar quarter ([15-68-502\(1\), MCA](#)).

**Applicable Tax Rates**

The lodging sales tax is 4.0% of the sales price. The lodging facility use tax is 4.0% of room charges.

**Collection Frequency:** Quarterly

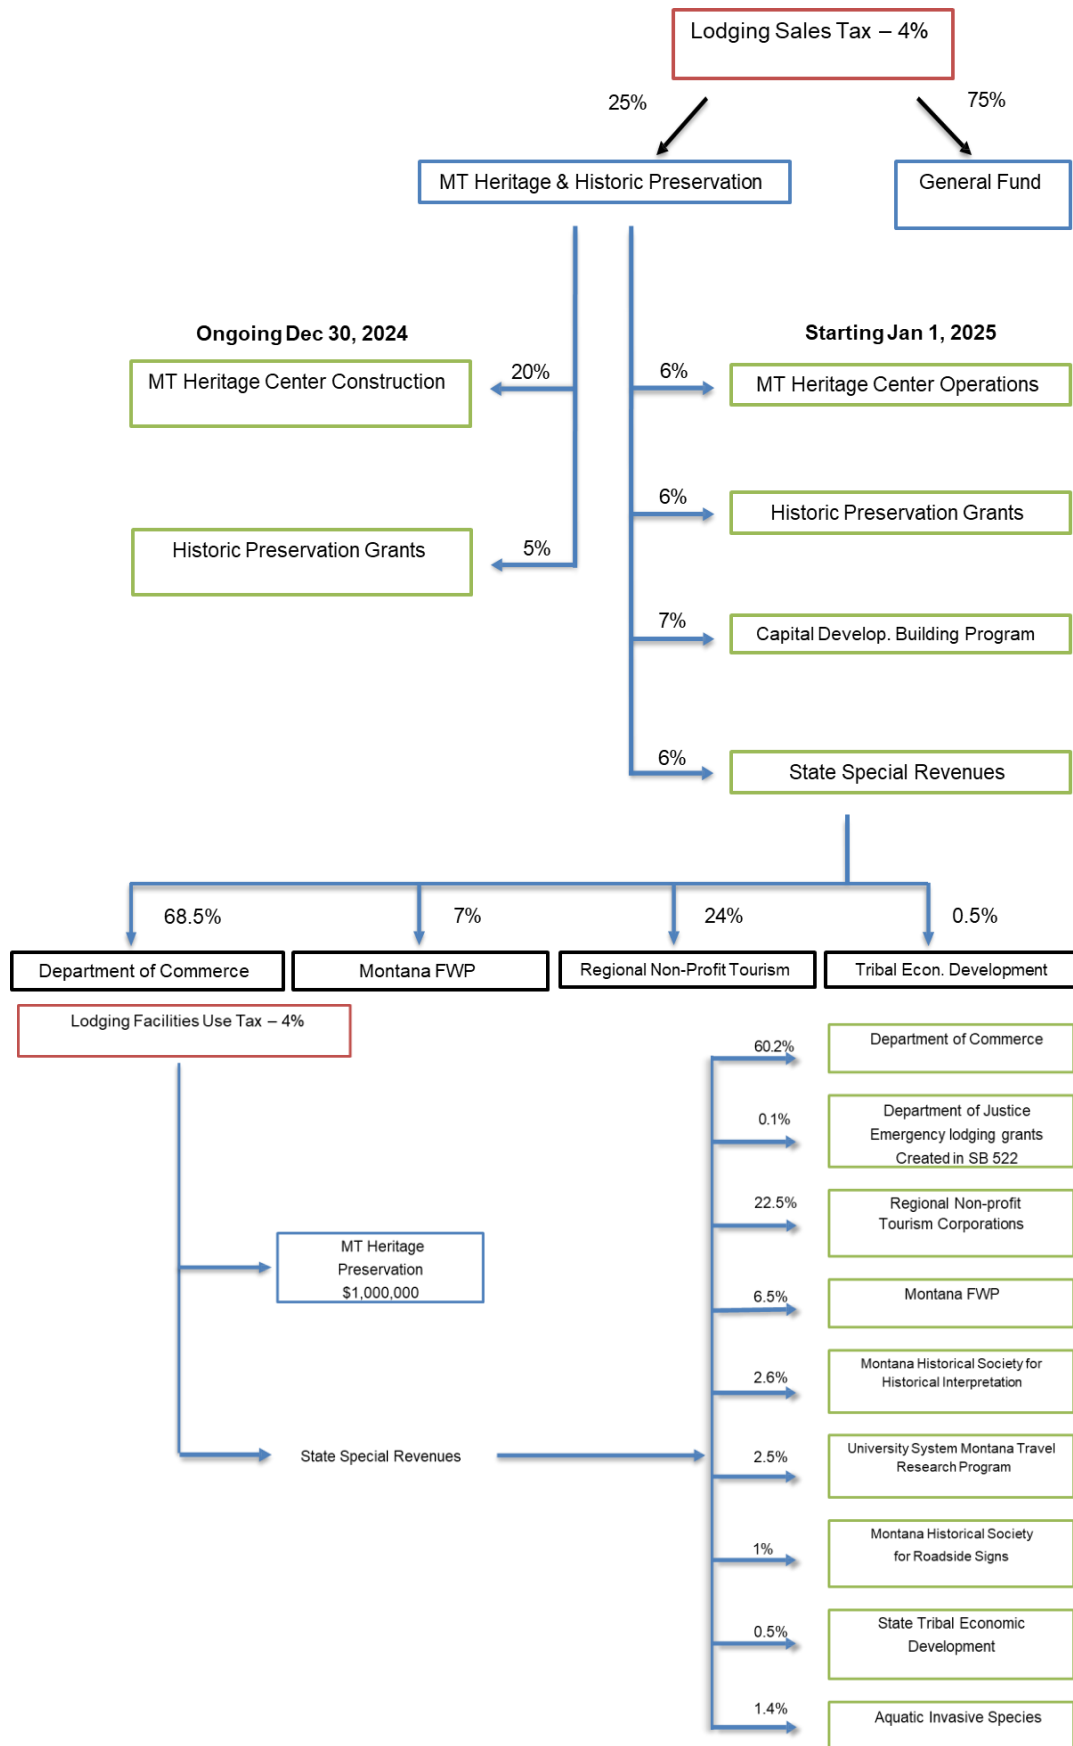

**Distribution**

[\(15-68-820](#) - Lodging Sales Tax)

- 75.0% of collections from the Lodging Sales Tax are deposited to the General Fund
- Until Dec 31, 2024, the remaining revenue will be distributed as:
  - 20.0% for funding the construction of the MT Heritage Center administered by the Dept. of Administration's Architecture & Engineering Division
  - 5.0% for historic preservation grants administered by the Dept. of Commerce
- Starting January 1, 2025, the remaining revenue will be distributed as:
  - 6.0% to the Historical Society for the operation and maintenance of the MT Heritage Center
  - 6.0% for historic preservation grants administered by the Dept. of Commerce
  - 7.0% to the Capital developments long-range building program account
  - 6.0% to the Dept. of Commerce for tourism promotion. This is further divided as:
    - 68.5% to be used directly by the Dept. of Commerce
    - 7.0% to Fish Wildlife and Parks for maintenance of facilities in state parks
    - 24.0% to regional nonprofit tourism corporations, conventions, and city visitor bureaus

[\(15-65-121](#) - Lodging Facility Use Tax)

- 60.2% to be used directly by the Department of Commerce
- 0.1% to be used by the Department of Justice for emergency lodging grants created in SB 522
- 22.5% to regional nonprofit tourism corporations, conventions, and city visitor bureaus
- 6.5% to Fish Wildlife and Parks for maintenance of facilities in state parks
- 2.6% to the Montana historical interpretation SSR
- 2.5% to the university system for the administration of a Montana travel research program
- 1.4% to the invasive species SSR
- 1.0% to the MT Historical Society to be used for roadside historical signs and historic sites
- 0.5% to the SSR for use by state-tribal economic development commission
- 2.7% or \$1 million, whichever is less, to the Montana heritage preservation and development acct

**Summary of Legislative Action:**

[SB 522](#) diverts 0.1% of the allocation of the lodging facilities use tax from the Department of Commerce and statutorily appropriates the funding to the Department of Justice to establish a grant program to provide lodging for victims of domestic violence or human trafficking. This has no general fund impact.

**Forecast Risks**

- Change in outlook for U.S. consumer spending on accommodations

**Revenue Estimate Methodology**

Data

The estimate for this source is based on historical collection data from SABHRS, and actual and forecast U.S. consumer spending on accommodations from IHS Markit.

Analysis

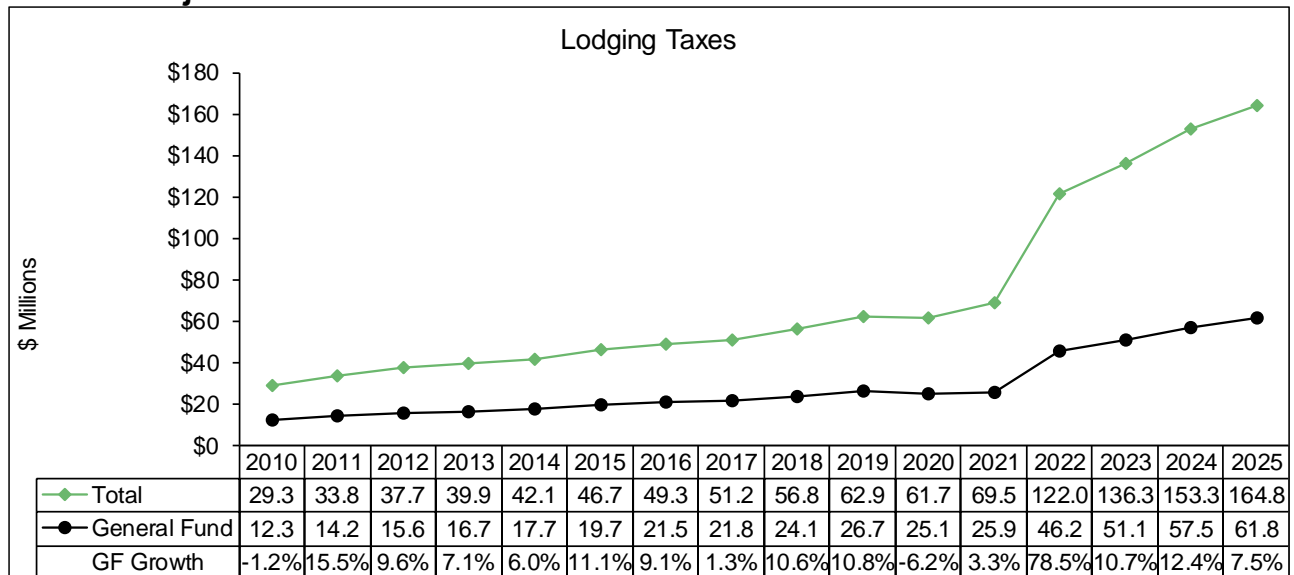

Total lodging taxes are made up of two separate taxes, the lodging facility use tax and the lodging sales tax; a proxy for taxable room charges—tax collections divided by the appropriate tax rate—is used as the starting point both sources. This proxy is modeled on U.S. consumer spending on accommodations to produce a forecast of taxable room charges. Estimates of taxable room charges are multiplied by the corresponding tax rate and summed to produce the total lodging tax estimate.

**Revenue Estimate Assumptions**

This section contains the assumptions used to generate the revenue estimates contained in House Joint Resolution 2. It does not reflect changes, if any, enacted by the 2023 Legislature.

Revenue Projection

Revenue History

### Motor Vehicle Fee

#### Revenue Description

The state assesses a variety of motor vehicle fees, including fees for the filing of motor vehicle liens, fees for new license plates, title fees, and annual and permanent registration fees. The fees vary according to the type of vehicle and the type of license plate. There are also Gross Vehicle Weight (GVW) fees on trucks and pickups, special fees for senior citizen transportation, veteran services, the highway patrol pension fund, salaries for the highway patrol, motorcycle safety, electronic commerce applications, and an optional registration fee on light vehicles for state parks and fishing access sites.

All fees on motorcycles and quadricycles, trailers, travel trailers, snowmobiles, off-highway vehicles, and watercraft are one-time only and permanent, except upon change of ownership. Fees on other vehicles are annual. Light vehicles older than ten years old may be licensed permanently, at the option of the owner.

#### Statutory Reference

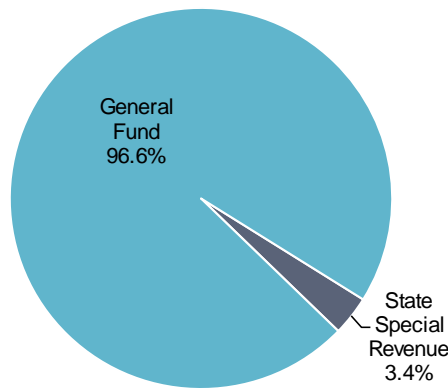

Fee Rate – multiple, but generally in [Title 61, Chapter 3, MCA](#); permanent registration: [61-3-562, MCA](#)  
Tax Distribution – [61-3-108, MCA](#)

**Applicable Tax Rates:** Various

**Collection Frequency:** Monthly

#### Distribution

Most motor vehicle fees are allocated to the general fund. Some fees, or a portion of them, are distributed to the specific state special revenue accounts, or to the county general fund.

#### Summary of Legislative Action:

[HB 224](#) allows Montana residents on active military duty who entered service from outside the state to apply for a waiver of motor vehicle registration fees.

[HB 333](#) changes the fee schedule for travel trailers and boats of certain lengths.

[HB 519](#) authorizes the use of digital driver’s licenses.

[SB 221](#) Allows persons who are currently serving, or who have previously served, aboard the USS Montana to title and register a vehicle in Montana and apply for USS Montana specialty plates.

Motor Vehicle Fee – Legislation Passed by 68th Legislature General Fund Impact (\$ Millions)

<b>Total General Fund Impact</b>	<b>\$0.000</b>	<b>(\$0.042)</b>	<b>(\$0.055)</b>

**Forecast Risks**

- Changes in forecast growth of Montana vehicle stock
- Changes to forecast growth of new vehicle sales

**Revenue Estimate Methodology**

Data

The data used to estimate the motor vehicle (MV) fees are obtained from SABHRS and IHS Markit.

Analysis

MV fees are currently imposed at different rates on eight major categories. Included in the fees assessed on motor vehicles in Montana are registration fees, two types of record liens, title fees, personal and new plate fees, senior transit fees, and veteran’s administration fees. The ninth category is made up of other miscellaneous fees assessed on motor vehicles.

With constant fees, the future change in MV fees results from change in the vehicle stock in Montana. Growth rates for the stock of Montana vehicles are modeled on IHS Markit estimates for the national and Montana-specific vehicle stock and new car sales nationwide. The growth rate is applied to the base year revenues of each fee category and projected forward at the same rate for all estimated fiscal years. The estimated tax collections of each category are then combined to create the total estimates for the MV fees.

**Revenue Estimate Assumptions**

This section contains the assumptions used to generate the revenue estimates contained in House Joint Resolution 2. It does not reflect changes, if any, enacted by the 2023 Legislature.

<b>Total General Fund Impact</b>	<b>\$0.000</b>	<b>(\$0.098)</b>	<b>(\$0.100)</b>

**Forecast Risks**

- Federal highway trust fund status
- State legislative funding of infrastructure projects

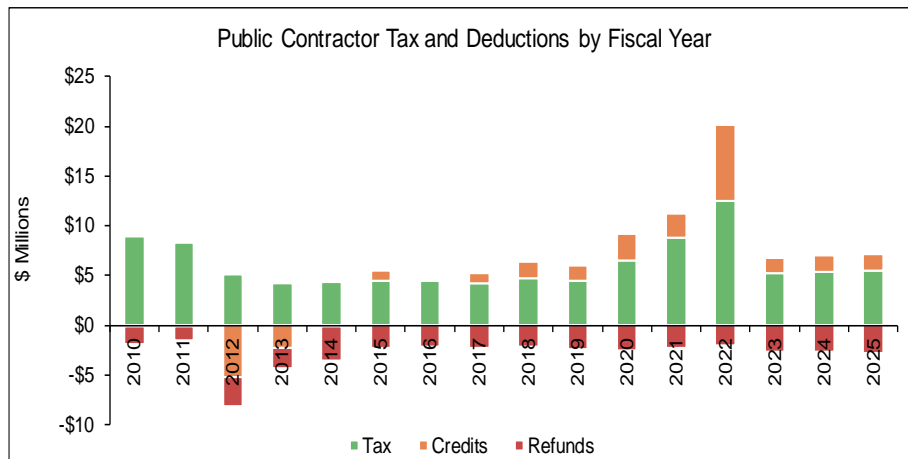

**Revenue Estimate Methodology**

Data

The estimate for this source is based on historical revenue collection and highway expenditure data from SABHRS. A proxy for gross tax collections is developed by adjusting the SABHRS total collection data to account for refunds and credits. The gross proxy is disaggregated into two contract classifications, highway payments and all other contracts.

Public contractor’s tax revenue has been highly variable due to inconsistencies in processing payment of refunds and credits; in addition, there has been recent volatility because of the increased number of public projects funded through the American Recovery & Reinvestment Act (ARRA) in 2009 and 2010, followed by higher levels of credits and refunds in subsequent years.

Refunds are made up primarily of refund claims against the class 8-business property tax. Credits are authorized for both individual income tax and the corporation license tax. There is a significant time lag between the date of the contract and the reimbursement of the tax through credits or refunds, so large fluctuations in public construction projects may continue to produce unusual future collection patterns.

Analysis

Highway payments are forecast on a time trend; all other contracts are forecast as an approximate historical average. This sum of these two categories is multiplied by 1.0% to obtain the gross tax revenue. Gross taxes are reduced by an aggregate forecast of refunds and credits to produce net tax collections.

**Revenue Estimate Assumptions**

This section contains the assumptions used to generate the revenue estimates contained in House Joint Resolution 2. It does not reflect changes, if any, enacted by the 2023 Legislature.

**Revenue Projection**

**Revenue History**

**Railroad Car Tax**

**Revenue Description**

The railroad car tax applies to the rolling stock owned by railroad companies, and the tax rate is equal to the average property tax rate for commercial and industrial property. Railroad car companies, which operate in several states, pay taxes on the portion of the property value allocated to Montana, based on the ratio of the car miles traveled within Montana to the total number of car miles traveled in all states, as well as time spent in the state relative to time spent in other states.

**Statutory Reference**

Tax Rate – [15-23-214\(1\), MCA](#)

Tax Distribution – [15-23-215, MCA](#)

Date Due – Report due to the Department of Revenue (DOR) by April 15<sup>th</sup> of each year for the previous calendar year ([15-23-103\(2\), MCA](#); [15-23-212, MCA](#)). The department calculates the tax due by the third Monday in October ([15-23-214\(1\), MCA](#)). Half of the tax is due by November 30<sup>th</sup> and half is due by May 31<sup>st</sup> ([15-23-214\(3\), MCA](#); [15-16-102\(1\), MCA](#)).

**Applicable Tax Rates**

The tax rate is equal to the previous year's average statewide tax rate for commercial and industrial property; in recent years, the rate has been about 3.0%. The rate is multiplied by the statewide average mill levy for commercial and industrial property.

**Collection Frequency:** Semi-annually

**Distribution:** All proceeds are deposited into the general fund.

**Summary of Legislative Action:** The 68<sup>th</sup> Legislature did not enact legislation impacting this source.

**Forecast Risks**

- Changing outlook for Montana retail sales

**Revenue Estimate Methodology**

Data

Data from DOR provides the value of national railroad car fleet, Montana’s rolling stock, railroad car tax assessed by company, the average mill levy and applicable tax rate. SABHRS data are used to check the estimates against the historic values.

Analysis

Although the railcar tax appears somewhat volatile, most of the volatility is caused by shifts in average mill levies and tax rates, both of which are controlled in large part by factors outside of the growth in rail shipments. The volatility can also be traced to litigation brought by rail companies and settled in federal legislation. In 1993, some rail companies protested tax rates, which reduced tax payments for four years. In 1997, the litigation was settled, and the companies were required to make both past and current payments.

Railroad properties are taxed as class 12 properties. To calculate total railroad car tax collections, the market value of the Montana fleet is multiplied by the average mill levy and tax rate. The market value of the rail fleet in Montana is based on a relationship with market value of the U.S. fleet. An estimate for the value of the national fleet is developed using the average rate of growth in the U.S. fleet value, based on a four-year pattern of growth. Montana's average share of the total fleet value is applied to the national estimate. Since 2004, the market value of Montana's rail fleet has been ranged between 0.41% and 0.60% of the nation's fleet. Growth in Montana-allocated value is expected to grow with the national fleet value.

After the Montana market fleet value is determined, the average commercial and industrial mill levy and tax rate must be calculated. The rate of the mill levy is calculated from the average of statewide commercial and industrial mill levies. The average mill levy is expected to increase because counties are able to raise levies at a rate equal to half of the annual rate of inflation. Furthermore, the increasing costs of school budgets will further force the average mill levy to increase.

The tax rate for the railroad property is created from a weighted average of six property classes containing commercial and industrial property: class 4, 7, 8, 9, 13 and 14. Class 4 property tax, which contains commercial real estate, is weighted more heavily than the other classes due to its higher market value. The estimated tax rate is shown for forecast years in the revenue estimate assumptions table below. The rail car tax estimates are completed by multiplying the Montana market value by the average mills and the tax rate.

### Revenue Estimate Assumptions

This section contains the assumptions used to generate the LFD revenue recommendation.

FY	Total Tax \$ Millions	GF Tax \$ Millions	Total MV of Fleet \$ Millions	MT Allocation Percent	Tax Rate	Mills	Montana Retail Sales \$ Millions

### Revenue Projection

**Revenue History**

**Rental Car Sales Tax**

**Revenue Description**

The 4.0% sales tax is imposed on the base rental charge for rental vehicles. The base rental charge includes use charges for time and mileage, insurance, accessory equipment, and charges for additional or underage drivers. It does not include price discounts, charges for operating an airport concession, motor fuel, intercity drop charges, and government taxes. Rental vehicles include light vehicles, motorcycles, motor-driven cycles, quadricycles, motorboats and sailboats, and off-highway vehicles. Sales to the U.S. government are exempt from the sales tax. Vendors can claim 5.0% of the tax as an allowance, up to \$1,000 per quarter.

**Statutory Reference**

Tax Rate – [15-68-102\(1b\), MCA](#)

Tax Distribution – [15-68-820, MCA](#)

Date Due – Before the last day of the month following the calendar quarter ([15-68-502\(1\), MCA](#))

**Applicable Tax Rates:** A 4.0% sales tax is imposed on the base rental charge for rental vehicles.

**Collection Frequency:** Quarterly

**Distribution**

Rental car sales tax revenue is distributed 75.0% to the general fund and 25.0% to the senior citizen and persons with disabilities transportation services state special revenue account.

**Summary of Legislative Action:** The 68<sup>th</sup> Legislature did not enact legislation impacting this source.

**Forecast Risks**

- Changing outlook for Montana personal consumption expenditures for transportation services

**Revenue Estimate Methodology**

Data

The estimate for this source is based on historical collection data from SABHRS, and historical and forecast Montana personal consumption expenditures for transportation services from IHS Markit.

Analysis

A proxy of rental car receipts is made by dividing historic tax receipts by the current tax rate. Future proxy values are modeled on Montana personal consumption expenditures for transportation services and then multiplied by the applicable tax rate to obtain projected tax revenues.

**Revenue Estimate Assumptions**

This section contains the assumptions used to generate the revenue estimates contained in House Joint Resolution 2. It does not reflect changes, if any, enacted by the 2023 Legislature.

F 2027	12.170	9.128	304.251	2,220.337

**Revenue Projection**

**Revenue History**

**Telecommunications Excise Tax****Revenue Description**

The retail telecommunications excise tax is levied on the sales price of retail telecommunications services originating or terminating in the state. It is paid by the retail purchaser and collected by the provider.

**Statutory Reference**

Tax Rate – [15-53-130, MCA](#)

Tax Distribution – [15-53-156, MCA](#)

Date Due – 60 days after the end of the calendar quarter ([15-53-139, MCA](#))

**Applicable Tax Rates**

A tax of 3.75% is applied to the sales price of retail telecommunications services. Sales price includes payment for services such as distribution, supply, transmission, and delivery, but excludes federal taxes, relocation of service, equipment repair, prepaid calling cards, and other items. Gross receipts from pre-paid wireless sales by third parties and internet services are also exempt.

**Collection Frequency:** Quarterly

**Distribution:** After retaining an allowance for refunds, all proceeds are deposited into the general fund.

**Summary of Legislative Action:** The 68<sup>th</sup> Legislature did not enact legislation impacting this source.

**Forecast Risks**

- Changing rate of landline usage
- Changing market share of prepaid smartphones, which are not taxable

**Revenue Estimate Methodology**Data

The estimate for this source is based on historical revenue data from SABHRS, U.S. Census Bureau data for landline use decline and cell phone use growth, International Data Corporation (IDC) Mobile Phone Tracker statistics, Google smartphone statistics, Centers for Disease Control and Prevention (CDC) Wireless Substitution Reports, and the IHS Markit forecast of Montana population.

Analysis

Telecommunication services have changed with users—especially younger users and those in higher populated areas—trending toward exclusive reliance on cell phones. Data collected by the U.S. Census Bureau on consumer trends suggests that many users had both landline and cell services as the cell phones increased in popularity, but now that cell service reliability is well established, users are dropping their land line service. The graph below shows the national trends, which are applied to the Montana forecast.

Total revenue has been declining since FY 2011 in part due to the DOR's loss of the pre-paid wireless case in 2011. The impact of the case was initially estimated to be an annual reduction in revenue of about \$1.0 million. However, the growth in the market share of prepaid smartphones was likely underestimated, resulting in an underestimate of the revenue reduction.

The current estimate assumes the prepaid wireless market share plateaus at 40.0% of all wireless service; however, if trends follow that of European countries, the prepaid market share could go above 80.0%, which would result in lower revenue.

**Revenue Estimate Assumptions**

This section contains the assumptions used to generate the revenue estimates contained in House Joint Resolution 2. It does not reflect changes, if any, enacted by the 2023 Legislature.

**Revenue Projection**

**Revenue History**

**Vehicle Tax**

**Revenue Description**

Light vehicles, motorcycles and quadricycles, snowmobiles, buses, trucks, truck tractors having a manufacturer’s rated capacity of more than 1 ton, motor homes, and certain trailers and travel trailers are taxed under a fee schedule that varies by age and weight.

**Statutory Reference**

Tax Rate – Watercraft, snowmobiles, off-highway vehicles (OHV), and light vehicles registrations: [61-3-321, MCA](#); vehicles greater than 1 ton: [61-3-529, MCA](#)

Tax Distribution – [61-3-509, MCA](#)

Date Due – Revenue for prior month is due on or before the 20<sup>th</sup> of the month ([15-1-504, MCA](#); [61-3-509, MCA](#)).

**Applicable Tax Rates:** Varies

**Collection Frequency:** Monthly

**Distribution**

Most fees-in-lieu-of-tax are deposited into the general fund. Exceptions are:

- Fees for luxury motor homes and vehicles is deposited in the motor vehicle division administration account
- Administration fee of 3.0% is deposited in the motor vehicle division administration account
- Fee of \$10 that is collected to partially fund highway patrol officers’ salaries

**Summary of Legislative Action:** The 68<sup>th</sup> Legislature did not enact legislation impacting this source.

**Forecast Risks**

- Changing outlook for Montana total vehicle stock
- Changing outlook for new vehicle sales

**Revenue Estimate Methodology**

Data

The data used to estimate the motor vehicle tax are obtained from SABHRS and IHS Markit.

Analysis

Vehicle taxes are currently imposed at different rates on five categories of vehicles (tax schedule varies by age and weight) including light vehicles, large trucks, motor homes, motorcycles (including tri-cycles), and boats and snowmobiles.

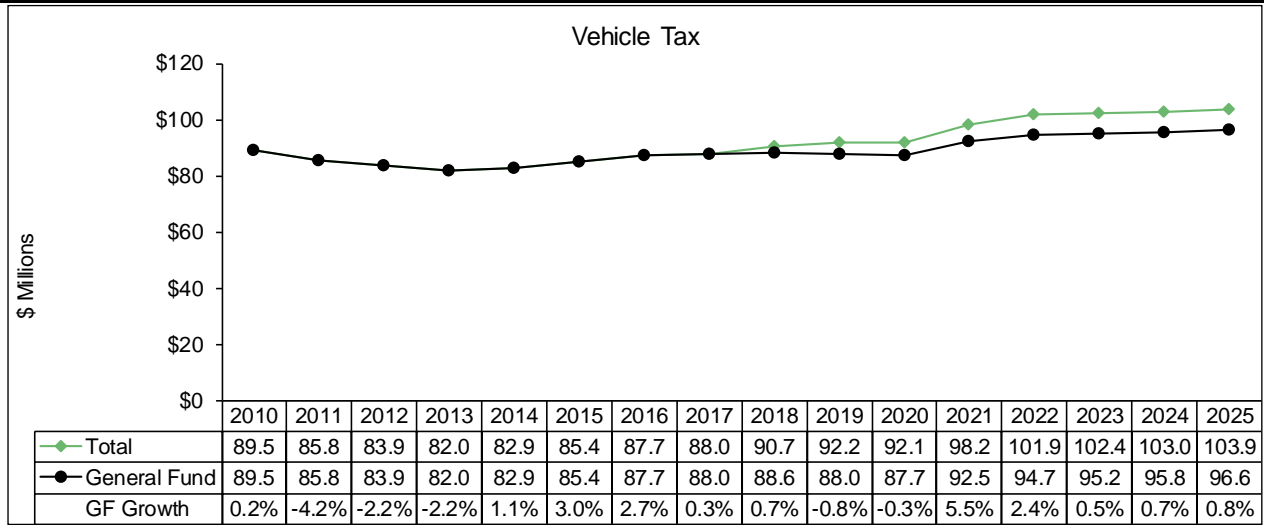

With constant fees, the future change in vehicle tax revenue results from change in the vehicle stock in Montana. Growth rates for the stock of Montana vehicles are modeled on IHS Markit estimates for the national and Montana-specific vehicle stock and new car sales nationwide. The growth rate is applied to the base year revenues and projected forward at the same rate for the forecast period.

**Revenue Estimate Assumptions**

This section contains the assumptions used to generate the revenue estimates contained in House Joint Resolution 2. It does not reflect changes, if any, enacted by the 2023 Legislature.
