

# OVERVIEW

Purpose of the Report  
History  
General Fund Revenue Estimates  
Revenue Impacts of Legislation  
Non-General Fund Revenue Estimates  
Revenue Legislation of the 2025 Session  
Economic Outlook for Montana

## **Overview**

### **Purpose of the Report**

As delineated in [5-5-227\(2\)\(a\), MCA](#), the Revenue Interim Committee (RIC) is required to prepare a projection of revenue to be available for legislative appropriation. In addition, [5-12-302, MCA](#) specifically requires the Legislative Fiscal Analyst (LFA) to estimate revenue from existing and proposed taxes and also requires the LFA to assist RIC in performing its revenue estimating duties.

The purpose of this report is to document the Legislative Fiscal Division (LFD) recommendations for anticipated revenues for FY 2025 through 2027. In almost all cases, estimates are based on current federal and state laws and do not include estimates for revenues from litigation or any other pending legal issues. This position is consistent with past recommendations to RIC.

### **History**

In 1989, the Montana Legislature established a process for the Legislature to develop revenue estimates for legislative appropriation. SB 341 (1989 Session) directed the then-Revenue Oversight Committee to prepare the revenue estimates. The legislation also provided that the revenue estimating resolution introduced and subsequent periodic reports issued by the Committee constitute the Legislature's current revenue estimate until final adoption of the resolution by both houses of the Legislature.

In 1991, the Legislature revised the procedures of estimating revenue by inserting the language that is now contained in [5-5-227\(2\)\(a\) and \(3\), MCA](#), including the language that the Committee's revenue estimates and underlying assumptions should be used by state agencies in the preparation of fiscal notes (Chapter 603, Laws 1991).

Because of disparities in the revenue estimates between the LFD and the Department of Revenue (DOR) during the 1997 session, House leadership requested that the Revenue Oversight Committee work with LFD and DOR to develop a process to resolve differences in revenue estimates before the 1999 Legislative Session.

### **Recent Process**

In 1999, the Legislature revised the structure of interim committees and assigned the revenue estimating responsibilities to the Revenue and Transportation Interim Committee (RTIC) (Chapter 19, Laws 1999). In the past, RTIC has adopted the revenue estimates in November of the year proceeding the next regular session. As a practical matter, the Committee cannot adopt the estimates much earlier than mid-November because the DOR income tax data is not available until November 1 (October 15 is the general deadline for taxpayers who requested an extension of time for filing an income tax return).

Staff of the LFD and the Governor's Office of Budget and Program Planning (OBPP) each present assumptions and corresponding revenue estimates for the Committee's consideration. In the past, the Committee has initially adopted the revenue estimates of the LFD and may make changes to those estimates based on information presented by OBPP, economists from the Montana University System, and other experts.

Finally, the resolution containing the Committee's revenue estimates must be pre-introduced by December 15 (see Rules of the Montana Legislature, Joint Rules 40-40(5)(a)). The Committee's estimate constitutes the Legislature's "current revenue estimate" until amended or until final adoption of the estimate by both houses.

## **Overview**

---

### **Path through the Legislature**

In the 1999, 2001, and 2003 legislative sessions, both houses of the Legislature adopted the resolution, and it was filed with the Secretary of State.

In 2005, the House of Representatives did not concur in the Senate amendments to the resolution, and the resolution died in the process. As such, the Senate estimates were the Legislature's current revenue estimates.

In 2007, the resolution died in the House Taxation Committee. Therefore, the RTIC estimates were the Legislature's current revenue estimates.

In February 2009, the House Taxation Committee amended HJ 2 and adopted a committee report. The resolution was rereferred to the Committee. In March, the Committee again amended the resolution and adopted a committee report. In each instance, the House Taxation Committee estimates became the Legislature's current revenue estimate. The resolution died in the process.

In March 2011, the House Taxation Committee amended HJR 2 and adopted a committee report. The resolution was rereferred to the Committee, where it died in process.

In November 2012, RTIC met to review and adopt a revenue estimate recommendation but were unable to agree on the estimate. Therefore, the committee did not introduce a resolution with the Committee's estimate. The Rules Committee subsequently met and adopted rules for the 63<sup>rd</sup> Legislative Session, including a requirement that the chair of the Senate Taxation Committee prepare a revenue estimate to be introduced in the Senate. The estimate contained in SJ 2, along with an initial set of amendments passed both houses by early February 2013. A revised estimate contained in SJ 27 was introduced in early April; however, due to missing the transmittal deadline for revenue bills, it ultimately failed to pass both houses.

At the November 2014 RTIC meeting, the OBPP recommendation was \$295.4 million above the LFD recommendation over the three forecast years. The committee ultimately adopted the LFD recommendations, with total adjustments in individual income tax and oil & natural gas tax equal to half of the total difference between the OBPP and LFD recommendations for individual income tax, corporation income tax, and oil & natural gas tax.

In January 2015, OBPP and LFD presented updated revenue estimates to a joint meeting of the House and Senate Tax Committees. At this time, the OBPP estimate was above the LFD estimate by \$358.6 million. The two tax committees formed a joint subcommittee to understand the revenue estimates and the corresponding differences in more detail and make a recommendation to the House Tax Committee. The joint subcommittee met weekly throughout February and March, and ultimately made a recommendation to the House Tax Committee based on the LFD estimate, with a variety of alternative assumptions that increased the three-year estimate to \$43.6 million above the RTIC estimate.

OBPP presented a revenue estimate recommendation to the November 2016 meeting of RTIC that was below the LFD recommendation by \$40.6 million. The committee adopted LFD assumptions, but included a general fund adjustment to each source so that the overall amount was equal to the OBPP estimate. In April, the House Taxation Committee amended HJR 2 based on the LFD March updated recommendation and adopted a committee report. The resolution was rereferred to the Committee, where it died in process.

In November 2018, RTIC heard the revenue estimate recommendations from OBPP and LFD, which were quite close: the OBPP recommendation was \$46.3 million or 0.6% below the LFD three-year forecast. The committee adopted the LFD estimate and corresponding assumptions, with an

## **Overview**

---

adjustment to corporate tax that essentially resulted in an average of the two estimate recommendations. The RTIC revenue estimate was incorporated into HJ 2 as the official revenue estimate of the legislature for the beginning of the session. In April 2019, the House Taxation Committee amended the individual income tax estimate contained in HJ 2 based on the LFD April updated recommendation for only that source, which lowered the revenue estimate by \$37.4 million over the three-year forecast period, thereby producing the Legislature's current revenue estimate.

In November 2020, the Revenue Interim Committee (RIC) heard revenue estimate recommendations from both OBPP and LFD. The LFD estimate was \$170 million larger than the OBPP estimate over the three-year forecast period, a difference of 2.2%. The committee ultimately adopted an estimate that was \$65.7 million above the three-year OBPP forecast. In March, the economic outlook had vastly improved from November, due to a combination of increased federal pandemic relief and the rollout of Covid-19 vaccines. The House Tax committee amended HJ 2, which increased the three-year forecast by \$305.9 million. This newly adopted estimate represented the midpoint of the OBPP and LFD revenue estimates.

In November 2022, the Revenue Interim Committee (RIC) heard revenue estimate recommendations from both OBPP and LFD. Over the three-year forecast period, the LFD estimate was \$101.7 million, or 0.9% less than the OBPP estimate. The Committee ultimately adopted the LFD estimate, which was left unchanged throughout the 2023 Legislative Session.

In November 2024, the Committee heard revenue estimate recommendations from both OBPP and LFD. The LFD's general revenue recommendation was \$217.9 million, or 1.8% higher than the recommendation from OBPP. RIC adopted a three-year estimate that was \$108 million below the LFD recommendation, which was essentially the midpoint of the LFD and OBPP recommendations. In April during the 69<sup>th</sup> Legislative Session, the House Tax Committee concurred in the estimate that was adopted in November by RIC.

## Overview

### General Revenue Estimate

The table below shows the general revenue estimates by revenue category as contained in HJ 2. Actual FY 2024 collections are shown, along with projections for FY 2025 through FY 2027.

General Revenue HJ 2 Estimate as Adopted by RIC (\$ Millions)						
Source of Revenue	Actual FY 2024	Estimated FY 2025	Estimated FY 2026	Estimated FY 2027	Estimated 2025 Bien	Estimated 2027 Bien
<b>Largest Seven Sources</b>						
Individual Income Tax	\$2,243.946	\$2,166.409	\$2,284.365	\$2,340.312	\$4,410.356	\$4,624.677

## Overview

General revenues for the 2027 biennium are projected to increase 0.8% over the 2025 biennium projection. As shown in the pie chart below, the largest seven revenue sources are anticipated to account for 87.8% of general revenues in the 2027 biennium. Since 2002, these sources have on average accounted for 83.0% of general fund revenue.

## Overview

### Select Non-General Fund Revenue Estimates

The table below shows estimates for selected non-general fund revenue for the 2027 biennium as contained in HJ 2 and from enacted legislation. These estimates are included because of their importance in the budgeting process.

House Joint Resolution 2 Plus Legislation Impacts Non-General Fund Revenue Estimates (\$ Millions)						
Source of Revenue	Actual FY 2024	Estimated FY 2025	Estimated FY 2026	Estimated FY 2027	Estimated 2025 Bien	Estimated 2027 Bien
Property Tax: 6 Mill	\$29.643	\$29.925	\$30.267	\$30.513	\$59.568	\$60.780
Natural Resource Taxes

## Overview

### Revenue Legislation of the 2025 Session

The following tables summarize the general fund revenue impacts of legislation enacted by the 69<sup>th</sup> Legislature by bill number.

General Fund Impact of Revenue Legislation Enacted by the 69th Legislature			
Bill Number & Title	FY 2025	FY 2026	FY 2027
HB 16 Revise infrastructure loan program and tax credit	-	18,000	18,000
HB 18 Deposit non-levy revenue in school equalization and property tax relief account	-	(11,116,000)	(10,393,000)
HB 56 Establish ambulance provider assessment fee program	-	-	\$632,631
HB 60 Generally revise state auditor laws	-	32,110	66,485
HB 110 Revise legislative services requirements to provide certain printed session information	-	(8)	(400)
HB 129 Provide income tax benefit to support emergency response volunteers	-	-	(353,000)
HB 137 Revise securities laws relating to fees paid by certain licensees	-	1,750	1,750
HB 140 Provide property tax assistance for law enforcement and firefighters injured in the line of duty	-	-	(590)
HB 211 Revise alcohol laws	-	13,000	13,000
HB 231 Revise property tax laws	-	(501,000)	(517,000)
HB 308 Maintain the county distribution level of metal mines license tax	-	-	-
HB 337 Revise income tax laws to lower income taxes	-	(20,805,000)	(190,644,000)
HB 368 Generally revise water supply requirements for coal-fired generating units	-	(2,000,000)	(2,000,000)
HB 515 Generally revise laws relating to school facilities	-	108,000	102,000
HB 668 Revising alcohol law to prohibit certain licensees from offering gambling	-	(21,458)	(21,458)
HB 845 Increase IRC 529 education savings income tax deduction	-	(202,000)	(212,000)
HB 849 Provide for special motorcycle plates promoting motorcycle safety	-	2,222	4,445
HB 853 Revise fees for licensed establishments	-	95,576	95,576
HB 908 Generally revise employee tax credit laws to include apprentices	-	-	(200,000)
HB 924 Generally revise state finance laws	-	1,960,000	2,090,000
HB 932 Generally revise conservation financing laws	-	(71,000)	(234,000)
SB 19 Revise sentencing laws related to theft	-	15,500	15,500
SB 27 Generally revise marijuana licensing laws	-	(178,000)	(355,000)
SB 60 Revise insurance premium taxes for certain captive insurers	-	-	253,280
SB 74 Generally revise marijuana laws	-	(491,000)	(542,000)
SB 104 Expanding access to low-cost capital to certain eligible projects and entities	-	178,800	60,000
SB 191 Provide for the licensure of residential treatment centers	-	240	240
SB 333 Repeal sunset on coal washing credit	-	(211,295)	(196,746)
SB 412 Provide for fee waivers of government documents to former foster children	-	(9,315)	(9,315)
SB 534 Provide property tax exemption for wireless infrastructure	-	-	(1,000)
SB 535 Revise laws related to experimental treatments	-	15,000	5,000
SB 544 Revise income tax laws for net operating loss carryovers	(461,000)	(96,000)	(58,000)
SB 555 Generally revise gambling laws	-	(13,000)	(13,000)
Total	\$ (461,000)	\$ (33,274,878)	\$ (202,392,602)

In addition to the general fund legislation above, HB 231 and SB 542 substantially revised property tax laws. These changes are anticipated to reduce property tax revenues that are deposited into the School Equalization and Property Tax Reduction (SEPTR) account by approximately \$50 million in both FY 2026 and FY 2027.

### Economic Outlook for Montana

This section highlights a few of the key national and state-specific economic variables that are used in the revenue estimate. The forecasts for each of these economic indicators—and many others that are also used in the revenue estimate—are provided by S&P Global.

#### U.S. Economic Indicators

##### *Gross Domestic Product (GDP)*

GDP is one of the most comprehensive national economic statistics. As noted by the Bureau of Economic Analysis (BEA), GDP is used by the White House and Congress to prepare the Federal budget, by the Federal Reserve to formulate monetary policy, by Wall Street as an indicator of economic activity, and by the business community to prepare forecasts of economic performance that provide the basis for production, investment, and employment planning.

## Overview

### Consumer Price Index (CPI)

The nation's inflation rate is measured by the price change of the CPI "shopping basket" of goods and services. Inflation is noted to have both good and bad effects. As prices rise, businesses increase prices and tend to become more profitable. At the same time, the consumer realizes a reduction in disposable income and spends less.

### S&P 500 Stock Market Index

The S&P 500 is a stock market index based on the market capitalizations of 500 large companies. Due to the diversity of companies, it is a broad representation of the U.S. stock market and is a good indicator for investment income.

## Overview

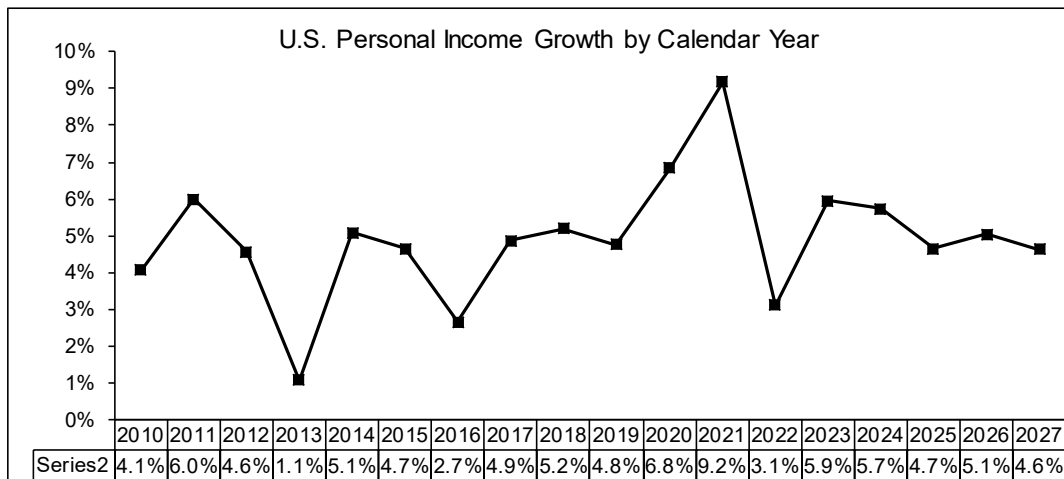

### U.S. Corporate Profits

Corporate profitability affects both corporation license tax and individual income tax estimates. When corporations are profitable nationally, there is an expectation that corporations will be profitable in Montana. Additionally, greater corporate profitability is largely responsible for the amount of dividends corporations pay to stockholders as well as the value of equity investments.

### U.S. Personal Income

Growth in Montana's economy is related to growth in U.S. personal income. In addition, the outlook for U.S. personal income likely impacts the outlook for Montana personal income.

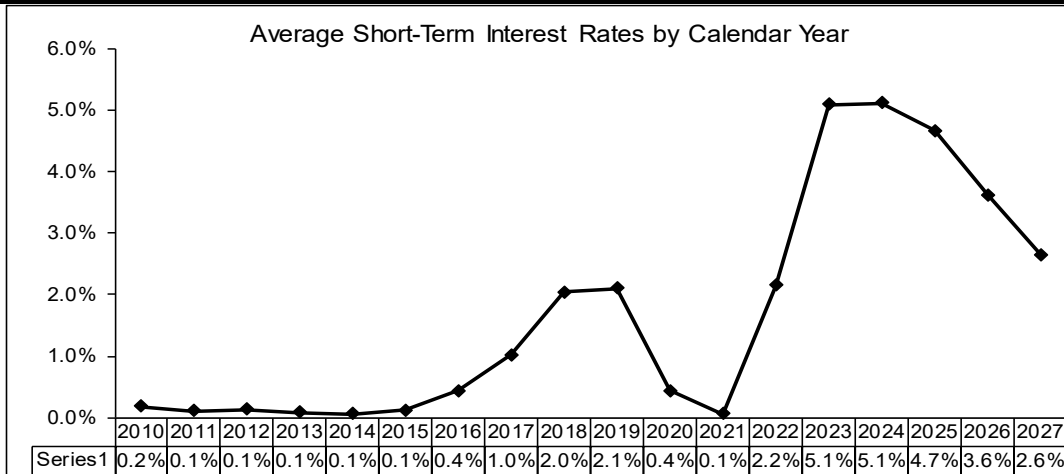

### Long & Short Term Interest Rates

A large portion of Montana's revenues is derived from investment earnings from trust accounts and daily invested cash. Interest rates also affect the amount of investment income that is reported on individual income tax returns. In addition to the state revenue impact, interest rates impact the climate in which consumers and businesses are likely to make investments and large purchases. While low interest rates produce less revenue for Montana's trust and interest holdings, higher income tax earnings may be expected as construction and sales activities increase.

Short-term rates are an average of 3-month corporate paper and 3 and 6-month Treasury bills. Long-term rates are an average of Corporate Aaa and Baa bonds, 10-year Treasury bonds, and 30-year Treasury bonds.

## Overview

### Oil Price: West Texas Intermediate (WTI)

At the national level, lower oil prices tend to correspond with a better economic outlook; manufacturing and transportation costs are lower, and consumers have more income to spend on goods and services. The impact on Montana revenue is more nuanced, however. Although overall consumer activity may increase with lower prices, natural resource extraction and related industry activity may also decline, resulting in lower individual, corporation, and natural resource tax collections. Montana oil price tracks closely with WTI, with an approximated 5.0% reduction to account for transportation costs.

## Overview

### Natural Gas Price: Henry Hub

Montana natural gas price tracks the national Henry Hub price, though as with oil prices, is lower due to transportation costs.

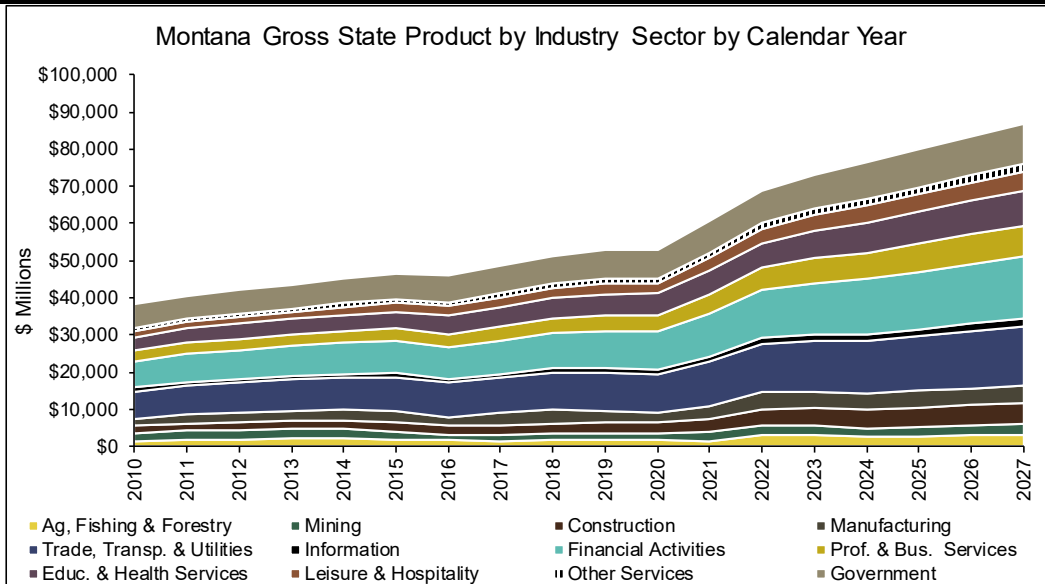

## Montana Economic Indicators

### Gross State Product (GSP)

All broad industry categories have grown since 2000, as measured by GSP; however, the strongest growth has occurred in manufacturing, and a broad array of service sectors: professional & business, financial, and health & educational.

## Overview

## Employment

## Wages

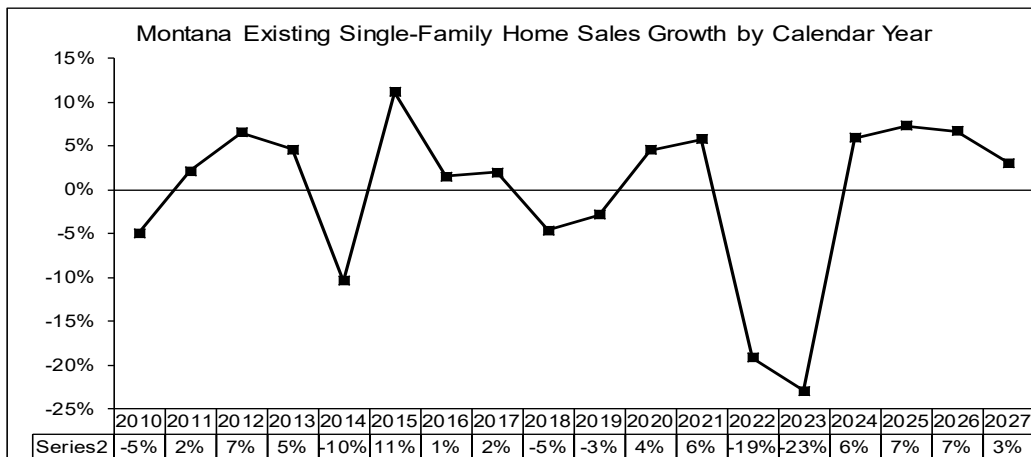

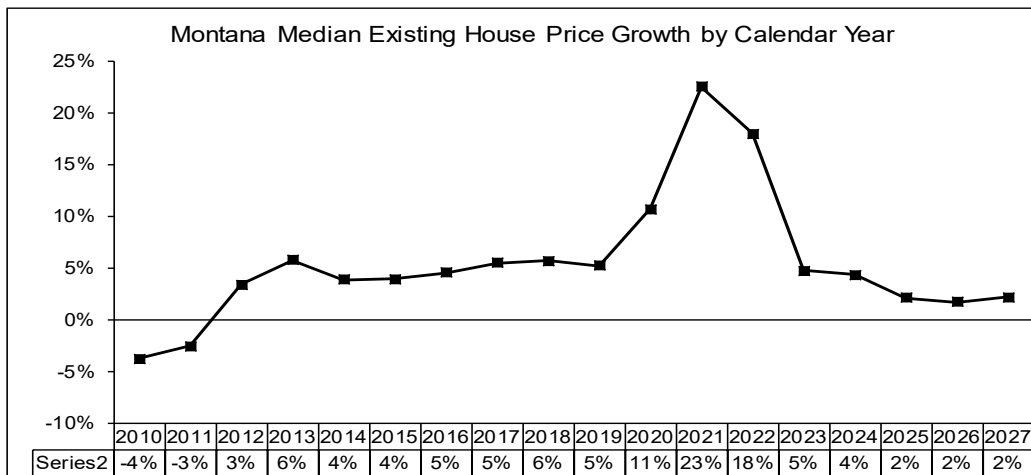

Wage income accounts for nearly two-thirds of individual income, and individual income tax accounts for about half of general fund revenue. Although wage income is not as volatile as several other income or revenue sources, even small changes in the outlook for wage income can produce large swings in the revenue estimate. The S&P Global wage disbursements variable for Montana is considered to be the single most important underlying indicator in the entire general fund revenue estimate.

## Overview

## Housing

The health of the housing market can be measured by median house price and annual sales. Housing is an important—and leading—measure of economic activity: it drives construction and related industry growth and reflects household formation and asset accumulation. Housing indicators are used in the individual and corporation income tax estimates.

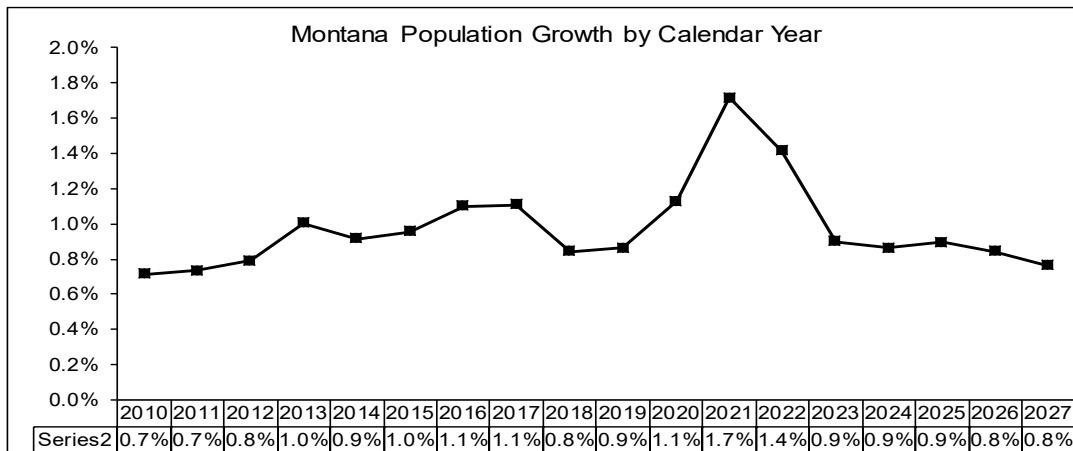

## Population

Population statistics are used to develop estimates for many of the revenue sources including beer, wine, liquor, and cigarette taxes. In addition to those sources where population has a direct effect, the

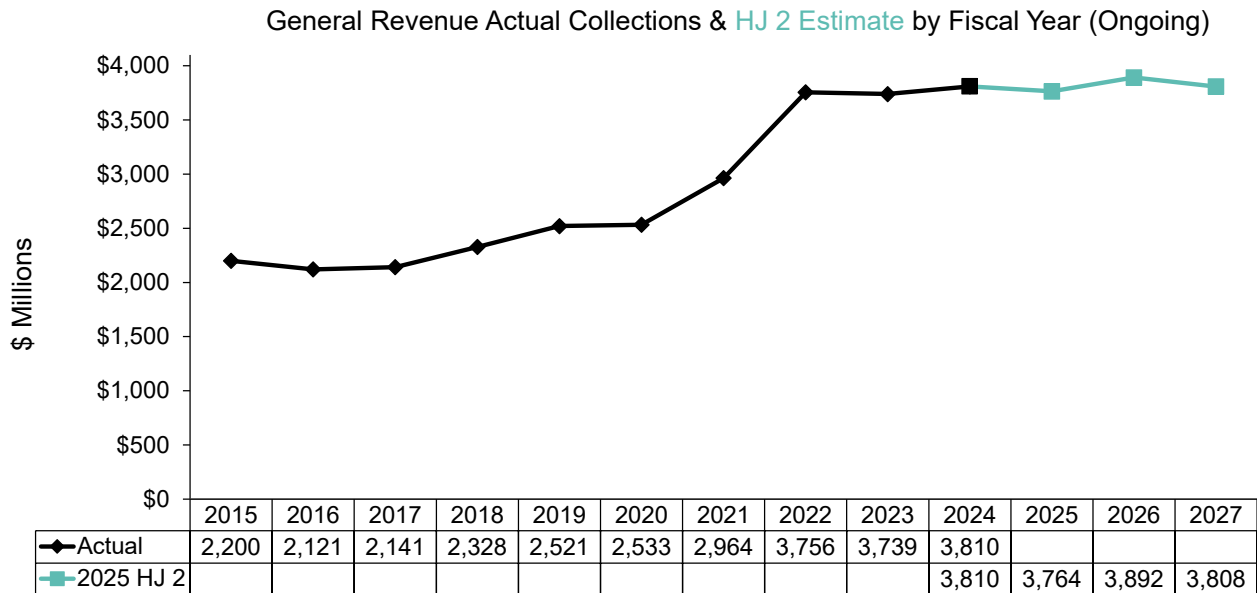

## Overview

size of the population indirectly affects the profitability of all businesses and the employment levels statewide.

## General Revenue History

The graph below shows actual total general revenue collections from FY 2015 to FY 2024 and includes FY 2025 through FY 2027 projected collections as adopted by the 69<sup>th</sup> Legislature. The estimate incorporates legislative impacts to HJ 2. Note the figure below is for ongoing revenue (one-time-only revenues and transfers are excluded).

## Summary

A complete summary of each general fund and selected non-general fund revenue source follows. Each summary provides information on the particular source of revenue including a description, the applicable tax or fee rates, and distribution mechanisms. A legislation impact table (if applicable) is shown summarizing all bills that impact the particular source of revenue.
